The Alban application was received after newspaper stories published Feb. 18 said several more licenses would be granted in Birmingham.

City officials have received no definite information on the allocation.

ACS to Question Men Aged 50-69 On Smoking Habits

As a part of a national survey, the smoking habits of south Oakland county men between 50 and 69 will come under close scrutiny within the next few months.

The survey is being conducted by the American Cancer society in an effort to help determine whether smoking influences the development of lung cancer.

About 300 workers are being trained in the county, each of whom will interview 10 men. Completed questionnaires, concerning cigaret, pipe and cigar smoking habits, will be forwarded to the national ACS office in New York for analysis.

AT THE END of each year the workers will report whether or not the men on their lists are still living. If not, a medical committee will check death certificates and other records to determine the cause of death.

ACS statisticians will analyze the number of lung cancer deaths among smokers and non-smokers to determine whether smoking can be considered contributing to lung cancer, a disease becoming more prevalent.

BED WETTING CORRECTED

A NEW METHOD DISCOVERED FOR SOLVING THIS DISTRESSING PROBLEM

If you are disturbed by your child's bed-wetting, investigate this new unique method for correcting this condition. Many forms of treatment have been tried in the past with little or no success. Now, a new approved method has been devised that is generally successful in ridding the child or adult of this humiliating habit in three to four weeks. This method is used on children over five years of age, and adults with no organic disorders.

The new method is really a conditioning of the child or adult, whereby he usually stops the bed-wetting habit all by himself. A dry child is a happy child. It was developed by a doctor and is endorsed and approved by many leading physicians. No drugs or attachments are used. Further information regarding this new scientific discovery may be obtained by telephoning Midwest 4-0767, or you may drop a postcard to
