BED WETTING CORRECTED

A NEW METHOD DISCOVERED FOR SOLVING THIS DISTRESSING PROBLEM

If you are disturbed by your child's bed-wetting, investigate this new unique method for correcting this condition. Many forms of treatment have been tried in the past with little or no success. Now, a new approved method has been devised that is generally successful in ridding the child or adult of this humiliating habit in three to four weeks. This method is used on children over five years of age, and adults with no organic disorders.

The new method is really a conditioning of the child or adult, whereby he usually stops the bed-wetting habit all by himself. A dry child is a happy child. It was developed by a doctor and is endorsed and approved by many leading physicians. No drugs or attachments are used. Further information regarding this new scientific discovery may be obtained by telephoning MIdwest 4-0767, or you may drop a postcard to

KING RESEARCH LABORATORIES,
517 Book Bldg., Detroit 26
