NO WATER

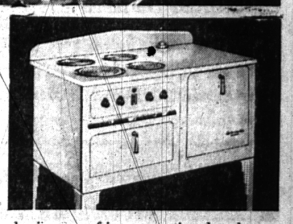
PROVE IT YOURSELF
on one of these
TRIAL ELECTRIC RANGES!



WAX string beans, for example, are cooked on your electric range with only ½ cup of water. Simmering over gentle electric heat, the beans are *steam-cooked*—not boiled!—conserving all their nourishing food values and steaming to melting tenderness. This is the result of using a *minimum of water*. An excess of water, afterwards poured into the sink (the cooking method ordinarily used) wastes the very things you pay for and deprives you of important minerals and natural elements.

★ We want you to try this waterless electric cooking *in your own kitchen*—without making any investment or being under any obligation. So we have arranged a special trial offer. We will install an electric range in your kitchen *without initial charge*, and let you use it for six months, removing it without charge if you do not like it. During the trial period, you pay for the service as registered by your meter, plus a monthly charge of $1 for the range. If you decide to keep the range, your monthly payments will be applied toward the purchase price. If you decide that you do not want it, the range will be removed at our expense.

Since this trial plan was begun a short time ago, over 1500 of our customers have taken advantage of the offer. Send in *your* application for a trial range today!
