Tips About Food in Refrigerator

It takes a little engineering knowledge for a housewife to properly use today's modern electric refrigerator, it is agreed by members of the home economics staff at Michigan State College.

Here are some of the ideas that will make the machine operate more efficiently and serve its purpose of reducing food spoilage:

Convenient location is desirable, with a work table nearby to hold food as it is put in or taken out of food storage. The fewer the trips and the fewer times the door must be opened, the more efficient the refrigerator will prove.

More economy is involved in making sure the machine is on the level and in a comparatively cool place away from the stove or from the sunny windows, and in the winter away from radiator or heat register.

Temperatures are important. A temperature a little under 50 degrees Fahrenheit will keep most perishable foods a reasonable length of time. There should be one area that is 45 degrees or lower, and service men usually point out this is directly below or beside the ice or freezing unit.

Milk, cream and butter quickly take up odors from other foods, so these perishables should be kept covered and in the colder part of the refrigerator. Meats, fish and poultry also rate the colder portion of the storage space. Uncooked or cooked, these should be kept covered and until cooked should not be stored very long, especially fresh fish. Eggs should be popped into the refrigerator, too, as a few hours at room temperature can injure quality.

Cleanliness is essential. Spilled food should be wiped up immediately and a thorough weekly cleaning is recommended with defrosting, or when the ice is low in an ice refrigerator.

How to Prevent Termites in House

Prevention is the surest control for termites. Builders recognize that there are many ways to prevent termites from gaining a foothold in the foundations of a house. Since dampness is a favorable condition for termite breeding, the ground around the house should slope away from the foundation walls to assure good drainage. Rainspouts should not empty close to the foundations.

FHA officials suggest that if a storm sewer is not available, sprouts should be emptied onto splash blocks located to carry rain water at least three feet from the building. If a dry well is used, it should be located at least eight feet from the building.

Generous

His Wife—What are you going to give Majority for a wedding present?

Mr. Everbroke—I was intending to give her a $500 bedroom set, but I couldn't raise the money, so I'll have to give her my check for $1,000 instead.

Are You Tired of Ham in Usual Form? These Will Stimulate Dull Appetite

Ham stimulates a dull appetite by its flavor and aroma and it is a good source of heat and energy. When the family has had boiled ham, fried ham or ham sandwiches perhaps one of these recipes below will be especially welcome.

Veal and Ham Pie

4 pounds of lean, uncooked cured ham, cut very thin.

4 pounds of lean veal, cut very thin.

2 onions, chopped very fine.

½ bunch parsley, chopped very fine; about 3 tablespoons after chopping.

Black pepper.

1 tablespoon Worcestershire sauce. Cooking sherry.

On the bottom of a large baking dish, place a layer of the thinly sliced ham. On top of this place a thin slice of veal. Sprinkle chopped onions over this and some of the chopped parsley. Add 3 or 4 dashes of black pepper. Use no salt. Add another layer of ham, then the veal and the other ingredients. Do this until all the ingredients have been used. Add the Worchestershire sauce and 2 tablespoons of cooking sherry. Cover with a pie crust rolled ⅜ inch thick and pressed in several places to allow steam to escape. Crimp firmly over the edge of the baking dish and place in an oven 450 degrees for 10 minutes, then lower oven temperature to 325 degrees and bake for 1 hour and 40 minutes. This serves a dozen or more.

Macaroni, Ham Au Gratin

Put a layer of cooked macaroni in a greased baking dish, add a layer of chopped, cooked ham and a layer of medium white sauce. Repeat the process. Cover top with buttered bread crumbs and sprinkle with grated cheese. Bake in an oven 375 degrees until thoroughly heated and browned.

Sandwich Suggestions

Combine equal quantities of minced ham and grated cheese with a little Worcestershire sauce and some prepared mustard. Put 2 tablespoons of this mixture and a slice of Bermuda onion between slices of bread and toast.

Put a thin slice of ham and another of chicken between circles of brown bread; add a little lettuce, mayonnaise or a slice of tomato as preferred.

Ham Dumplings

Blend 2 cups of prepared biscuit dough, 1 cup minced ham and 3/4 cup of water. Pour in a buttered mold and steam in a closely covered pot for 1½ hours. Surround the cooked dumplings with cold slaw and garnish the slaw with diced ham fat that has been cooked in a frying pan until it is very crisp.

Ham Fondue

Soak 1 cup of soft bread crumbs in 1 cup of milk. Melt 2 tablespoons of butter and add 1 cup of finely chopped ham. Turn in the soaked crumbs with 1 egg slightly beaten and salt, pepper and paprika to taste. Cook 10 minutes or until thick. Sook 10 minutes or until thick. Serve on toast.

Ham Blankets

Combine 1 cup of chopped raisins, 2 cups cooked rice, ½ cup chopped pickled chili peppers or other pickle, 1 beaten egg, 1 tablespoon Worchestershire sauce, paprika and salt to taste. Spread prepared mustard on one side of twelve slices of ham, place some of the prepared mixture on each slice and bring ends together and fasten with toothpicks. Fry until brown or broil under flame. May be made with thin slices of raw or broiled ham.

Baked Canned Spiced Ham

1 pound can spiced ham.

¼ cup brown sugar.

Whole cloves.

3/4 cup pineapple juice.

Remove the ham from the can and cut in ½ inch slices. Place the slices in a flat baking pan and pour in the pineapple juice. Sprinkle the ham with the brown sugar and dot with the whole cloves. Place in the oven and bake at 400 degrees for about 20 minutes or until the sugar melts and becomes crusty.

Paint Concrete In Colorful Style

Concrete floors on porches, stoops, garages, and basement recreation rooms may easily be freshened with colorful paints. A reliable formula is a primer coat of floor enamel in the color selected, thined with linseed oil or turpentine in accordance with directions. Allow to dry and then apply a second and third coat of the same enamel full body.

Corn on the Cob is as American as Yankee Doodle and just as popular with the home folks. Serve it with dinner tonight . . . long ears with even rows of big, plump kernels as tender as the butter that bathes them. Corn . . . sweet and fresh . . . is today's special in our Produce Department.
