Iron in Water.

Half a part to the million of iron in water is detectable by taste, and more than four or five parts make water unpalatable. In some mineral springs iron is the constituent which imparts a medicinal value to the water, but ordinarily it is undesirable. More than 2.5 parts a million in water used for laundering makes a stain on the clothes. Iron must be removed from water from which ice is made, or a cloudy, discolored product will result. An iron content of more than two or three parts a million in water used in the manufacture of paper will stain the paper.

Wise Practice of the Incas.

The Incas, ancient rulers of Peru were one of the earliest authentic examples of the high eugenic development of the human race. Their system of choosing each year the finest physical specimens of young womanhood from all classes to become 'brides of the sun,' or wives of the ruler, having quite an opposite effect to that of the limited and unfortunate matrimonial customs of present day royalty.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer $100 for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & Co., Toledo, Ohio. DON'T KEEP YOUR SAVINGS IN A SOCK

Before the advent of the Savings Bank, people who had thrift enough to save, resorted to all sorts of expedients to house and hide their *savings.* A wool sock was a favorite abiding place for the surplus cash. A tin box hid under a plank in the floor was another. Behind picture frames and in old clocks were often the secret repositories. And even today with all the educational advertising the banks of our country are doing these improvident methods of provincialism still exist. The money lies dormant and insecure, and with no earning power. Placed in the Savings Department of this Bank, the savings are secure, immune from theft, and become a steady earning power. Start an account today, add to it regularly, and prepare for a rainy day.
