PACKARD SIX

Never has a fine car enjoyed such popularity and such a wide circle of ownership, as the Packard-Six.

The reason, of course, is that motor car owners, who had been forced to advent confined themselves to lesser cars, have learned that it actually costs them less to own a Packard.

(a) Where the water has been turned off by the Department for any reason, no person or persons except authorized employees or agents of the Department may turn it on again. When this rule is violated the person or persons so doing shall be liable to the penalties hereinafter provided, and the water may be shut off at the corporation cock at the main, in which case the owner shall, before it is turned on again, pay in advance the charge of the Department therefore, which shall be fixed by the Superintendent.

(f) Public drinking fountains and watering troughs shall be used for those purposes only, and any person found guilty of using such water for other purposes shall be punished as hereinafter provided.

(g) No steam engine boiler shall be directly connected to the service pipe. The owner shall provide a tank of sufficient capacity to afford a supply for at least ten hours into which the service pipe shall discharge.

(h) No person or persons shall obstruct or interfere with any stop-cock, valve or fixture connected with the Department, by placing in, or about it, building materials, rubbish, soil, snow or other hindrance to easy and free access thereto.

(f) Any officer, inspector, foreman or other authorized employee of the Department shall have free access at all reasonable hours to any premises supplied with Department water for the purpose of making an inspection thereof, including the examination of the entire water supply and plumbing system on said premises. No person shall refuse to admit the authorized inspectors and employees of the Department to any premises for any such purpose. In case any authorized employee be refused admittance to any premises, or being admitted shall be hindered or prevented in making such examination, the water may be turned off from such premises after giving 24 hours' notice to the owner or occupant thereof.

Section Eight.—Sprinkling and Fire Protection.

(a) Hose used for sprinkling or washing purposes must not be used without a nozzle or a perforated sprinkler attached to its outer end. The internal diameter of the nozzle at its delivery end shall not exceed one-fourth of an inch, and the aggregate capacity of any perforated sprinkler shall not exceed that of a one-fourth inch nozzle.

(b) From the first day of June to the first day of October in each year, the use of hose for sprinkling or washing purposes is restricted to the hours from 7 A.M. to 8 A.M. and from 5 P.M. to 8 P.M. The Village Commission may by resolution suspend or regulate any and all forms of sprinkling and washing by use of a hose whenever public exigency may require. Any form of sprinkling is strictly prohibited during an alarm of fire; sprinkling shall cease immediately the fire alarm is sounded, and shall not be resumed until the "fire out" signal is blown.

(c) Where pipes are provided for fire protection on any premises or where hose connections for fire apparatus are provided on any pipe, each connection or opening on said pipes shall have not less than 15 feet of fire hose constantly attached thereto, and no water shall be taken through such openings or hose for any purpose other than extinguishing fires, except for the purpose of testing such fire equipment. Any such test must be conducted under a special permit and under the supervision of the Department.

(d) Fire hydrants are to be opened and used only by the water and fire department of the Village or by such persons as may be specially authorized by the Department. No person, firm or corporation shall in any manner obstruct or interfere with access to any fire hydrant by placing or storing, temporarily or otherwise, any object, material, snow, debris or structure of any kind within a distance of 15 ft. of same.

Section Nine—Water Rates.

(a) For the purpose of making and collecting charges for water used by consumers, the calendar year shall be subdivided and designated as follows: the quarterly periods shall respectively begin on the first day of January, April, July and October, and shall extend to the beginning of the succeeding quarterly period, and all water rates shall be due and payable on the first day of the quarter as specified above for the each preceding quarter.

(b) All charges for water will be made against the owner of the premises supplied and must be paid within fifteen days after they become due and payable. If not paid within thirty days the water may be turned off from any premises against which such charges stand and the amount of the unpaid bill shall become a lien upon such premises until paid. When so turned off the water will not be turned on again until the charges have been paid, together with a further sum of $.75 as a turn-on fee.

(c) Where one property is occupied by two or more distinct families, or where a business building is occupied by two or more firms or persons, each family and each business firm shall be considered as separate premises, for each family, person or firm so occupying said property, except that in case of office buildings the occupants of such offices shall be considered as occupying one premise and shall be supplied with water through a single meter. Water shall be supplied to such separate premises as defined above through separate meters, and any default in payment therefore shall subject such premises to the penalties as provided in the preceding paragraph.

(d) In case of the temporary vacancy of any premises, the water will be turned off at the stop-cock and the meter removed by the Department upon the written request of the owner of the premises to the Water Collector, and will be turned on again and meter set when requested upon the payment of a turn-on fee of $.75. The minimum charge for any quarter in which such vacancy occurs will be reduced in proportion to such vacancy, but no rebate will be allowed for a period of less than 30 successive days in any quarterly period. Where premises are left unoccupied, with the water not turned off by the Department, no rebate will be allowed nor will any allowance be made for any water registered by the meter that may leak or waste through the plumbing or fixtures.

(e) The following schedule of water rates or prices is hereby established and shall be charged for water supplied by the Department.

The minimum charge in any quarter will be for six thousand (6000) gallons of water whether or not this quantity be registered by the meter and shall include the meter rental.

The foregoing rates shall be subject to a discount of ten (10) per cent if paid on or before the 15th of the month in which they become due. No discount will be allowed after the 15th and if not paid on or before the last day of the month in which they become due the water shall be shut off as provided in paragraph (b) of this section.

Special Rates

Rates for special supply or for temporary supply for any purpose shall be as fixed by the Superintendent, and as provided in Section 1, Five, paragraph (d) of this ordinance.

(f) The Department will deliver or mail bills to the premises to which the water is supplied, but will assume no responsibility for loss or failure of such bill to reach the proper person. Tenants of premises for which the owner pays the water bills should see that such bill reaches the owner promptly for payment.

(g) Charge will be made for all water registered by the meter, and no deduction will be made for leaks or for alleged inaccuracy of the meter, except as provided in Section Six, paragraph (1) of this ordinance.

(h) Payment of all water charges and other accounts due the Department shall be made to the Water Collector of the Village of Birmingham at the office of the Village Clerk.

Section Ten—General Provisions.

(a) Persons claiming to be improperly charged for water may make complaint to the Commission, who shall examine the matter and make such decision in the case as may be deemed necessary and in conformity with the established rates.

(b) Should it become necessary to shut off the water from any section of the Village because of accidents or for the purpose of making repairs or extensions, the Department will endeavor to give timely notice to the consumers affected thereby, and will, so far as practical, use its best efforts to prevent inconvenience and damage arising from any such causes, but failure to give such notice shall not render the Department responsible or liable for damages that may result therefrom, or for any other cause.

(c) Each section of this ordinance and every part of each section are hereby declared to be independent sections and parts of sections and the holding of any section or part thereof to be void, ineffective or unconstitutional for any cause shall not affect any other section or part thereof.

(e) All previous ordinances concerning the conduct, operation or maintenance of the Water Works are hereby repealed and all parts of Ordinance No. 104 inconsistent with any of the provisions of this ordinance are hereby repealed.

Blushing.

Blushing is a sign of a self-conscious and shy nature. It is also the expression of a sensitive regard for the opinions of others. Some girls can't blush. Idiots and habitual criminals never blush. Blushing is often a sign of a refined and modest disposition. It is a curious fact that short-sighted girls are more liable to blush without their eyeglasses than when wearing them.
