Girls are not given the industrial training opportunities open to boys.

This is the contention of Miss Cleo Murtland, associate professor of the department of vocational education of the University of Michigan, in a talk Nov. 13 before the American Association of University Women.

She quoted statistics showing the largest percentage of the 8,500,000 women in industry in the United States engaged in clothing manufacture. Michigan has 15,000 women employed in this trade, while 12,000 are working in automobile factories.
