Children's Wildflower Show Feature of Floral Exhibit

The annual spring flower show of the Bloomfield Hills and District Horticultural Society will introduce a new feature this year, it was decided at a special meeting held last Thursday evening on the estate of Col. Edwin S. George.

All the exhibits shown must be grown outdoors, no hothouse exhibits will be admitted according to rules adopted Thursday evening. Previously the majority of exhibits have been hothouse specimens. This year the outdoor gardener will be given an opportunity to prove his skill.

The time and place of the show will be determined at the next meeting of the Society which will be held the second Thursday in May. The two locations under consideration are the pavilion at Cranbrook or Baldwin High School.

The flower show committee in charge of arrangements includes Arthur Claxton, Ivan Coupar, and A. A. Dennis.

An additional feature of interest will be the wildflower contest open to school children. Children will be asked to gather wild flowers, bring to the show and be able to identify each specimen. Prizes will be awarded to both boys and girls identifying the greatest number.

The other rules of the show provide that entries must be in the hands of the secretary two days previous to the show; all exhibits must be in position by noon that day; no competitor shall receive more than one premium in any class; in classes where less than two exhibits are shown, first prizes may be withheld by the judges; the judges decision must be accepted as final.

A change in the constitution of the Society was adopted which gives associate members, estate owners, the status of honorary membership without dues. Active members are those actively engaged in gardening or in the horticultural business.

"ACCURATE TEMPERATURE is *half the recipe*"

"BAKING *and* ROASTING are *easy with my* ELECTROCHEF automatic oven"

★ A study of one thousand families using the ELECTROCHEF electric range showed a cooking cost of less than one cent a meal a person

"Exact oven temperature is as important to perfect baking as correct measurements and proper ingredients. Every good cook knows that a successful cake is impossible without even baking heat, accurately maintained.

"My Electrochef automatic oven makes baking and roasting easy. I never have to guess at the right temperature, because I know every minute exactly how hot the oven is. The mirror-like inner walls of the oven distribute the heat evenly, and the accurate heat control maintains just the right temperature. No wonder my cakes are light and fine-grained, every time I bake!"
