Springdale Pk. Bomb Was Home-Made

According to the state police laboratory report, forwarded to Police Chief Ralph W. Moxley, the bomb which caused considerable damage to the ladies' rest room at Springdale Park last November was a rather crude, home-made affair.

Roughly classified as "gun cotton" the bomb, state experts said, was one which could have been made in any home or school laboratory. Workmanship was that of an amateur who, apparently, was just experimenting, according to police.

Milk Prolongs Life, Dairyman Tells Rotarians

Frequent use of milk has been found to prolong life from six to seven years, W. J. Lippert, assistant sales manager of a Detroit dairy, told Birmingham Rotarians Monday noon.

"The average cow yields about 5,000 pounds of milk a year, and she eats two tons of hay, 1½ tons of concentrates, two tons of sileage and lives 150 days on green pasture," he explained.

The 60,000,000,000 quarts of milk consumed annually in the U.S. would require a milk train 17,627 miles long, he said.

"The housewife would be surprised to learn that more time is spent cleaning and sterilizing a dairy from top to bottom each day than is devoted to processing and bottling the milk," he emphasized.

For the results they bring, Classified Ads are so inexpensive.

Gasser said that 250 guests could be accommodated and out of these there would be 58 outstanding high school players and their coaches from Oakland County high schools.

INCLUDED AMONG these will will be Coach Vincent Secontine, Captain Gordon Shira, Captain Elect Tom Tracy and Jerry Tewilliger of Baldwin high school.

We Heard It Said By—

Clark J. Hallock, 503 Oakland: "Alas! there seems to be no medicinal antidote against the recurrence of confusion and unrest on our earth. Just when we thought affairs were off to an even keel, one or more politicians would upset the apple-cart. Why? I don't understand. Apple-carts were made to transport apples in, and not applesauce. Maybe the manufacturers ought to put four wheels on our political apple-carts so they would not upset so easily—there'd never be any danger of the tires going flat, what with all the political hot air available."
