Lenten Services To Follow Theme At St. Andrew's

The Wednesday night Lenten services schedule of St. Andrew Evangelical Lutheran Church, Maple and Telegraph roads, will carry the theme of "Followers of Christ". Every Wednesday at 8 p.m. in the chapel during the Lenten season, one of the names by which Jesus' original followers was known will be defined and given practical application in the present work of the Church, by the Rev. John A. Root, Pastor. Specific distinctions between such designations as disciple, witness, steward, saint and elect of God will be explained.

This series began last night, March 7, with the Ash Wednesday service of Holy Communion.

During Lent, Pastor Root's Sunday series of Sermons at both the 8:30 a.m. and 11 a.m. worship services will examine the authority and the definitive action implicit in the "Excepts" of Christ given to His Followers, such as "Except Ye Be Born Again".

Did Landrum-Brown Report Also Predict Problems Of Commercial Aviation?

To the Editor:

Backers of a proposed new $50 million international jet airport for Oakland County regard as infallible prophecy the 1959 Landrum-Brown report which predicted over 900,000 passengers departing annually from this area by 1970 as compared with 2.7 million leaving from Detroit Metropolitan Airport.

Did the same report also accurately predict the problems of commercial aviation's jet fleet in 1962—operating at half capacity, with serious attempts at mergers by major airlines in an effort to shrink oversized operations down to actual needs?

CIVIL AVIATION, both private and commercial, is used by a small segment of the population. Surveys made by a major airline indicate that 80 per cent of us have never flown in a commercial airliner.

Eighty-six per cent of the trips being made are charged off on company expense accounts. Of the average of 184 aircraft based at Pontiac Municipal Airport throughout 1961 about 85 per cent are business or corporation owned.

Since passage of the Federal Airport Act of 1946, civil airport users have been beneficiaries of nearly $700 million in Federal grants for airport construction, including the administration and research costs of the program.

In addition almost $4 billion has been spent for the establishment, administration, maintenance and operation of the Federal Airways System.

AIRPORTS AND airways may be important to aviation enthusiast James Robbins and his fellow industrial and business leaders in the conduct of their affairs. But why should taxpayers throughout the country be obliged to provide such facilities for the benefit of a minority?

What about "learing for learning sake" and the fun 'n delight of it? And finally:

AS THE New York Times pointed out a month ago, "everything can not be . . . tested . . . on a piece of paper."

"Testing, testing, testing . . . Gee, I'm glad I entered college when they merely asked you, "Are you willing to try?" I said I was. I did. And the four years flew in pure delight.

B'ham B of E Accepts Bids For New School

The Birmingham Board of Education accepted bids last week for the construction of Meadow Lake School and approved 1962-63 professional salary schedules.

Upon the recommendation of architect Linn Smith, the board awarded general construction bid to the Trowell Construction Co. of Detroit on a bid of $546,000.

Mechanical work will be done by the Brady Plumbing and Heating Co. of Detroit for $132,150. Kitchen equipment will be supplied by the Illinois Range Co. of Mt. Prospect, Ill. for $13,382. The contract for electrical work will be awarded later pending the obtaining of further information by Smith.

THE 1962-63 salary schedules for the professional staff are in line with the five-year budget projection upon which the November election was based.

Beginning July 1, the salary for beginning teachers with a bachelor's degree will be $5000, with a merit maximum of $8,100. The beginning master's step will be $5,300; merit maximum, $8,750. For a masters degree plus 30 hours, the beginning salary will be $5,600, with a merit maximum of $9,250.

IN OTHER ACTION, the Board took under advisement a request of the Barnum PTA, as presented by Al Scott and Harry Smart, president, that major improvements be made to the Barnum building.

Also discussed were proposed attendance area changes for elementary schools for 1962-63. Information is currently in the hands of elementary principals. No changes are proposed for secondary schools.

The University of Michigan Memorial-Project is a broad program of research in peacetime uses of atomic energy, and its facilities and program are financed by private gifts which to date have exceeded $10 million.
