

BRILLIANT WEDDING

A Story for New Years.

Everybody who knew anything about the Evermonds knew that these were people of no ordinary...

First, their oldest daughter, beautiful Nellie Evermond, became infatuated with an opera singer...

Then, the only son, Willie Evermond, was betrothed to a girl who was as beautiful as she was virtuous...

There was left only Mr. Evermond, his wife, and a lovely young girl, the only one of her name...

Sue Gray had come to live with the Evermonds when she was an infant. Her mother had been the only sister of Mr. Evermond's first wife...

The day of his departure arrived. He had been out with his father in the morning, and only came to lunch at noon.

After lunch there wanted but one hour to the time appointed for the steamer in which he had taken passage to sail.

Will Evermond had nothing of the coward's blood in his veins, but he was not so stout as to allow her to share my disgrace...

Mr. Evermond lay upon the sofa in fashionable hysteria. Will knelt beside her and touched his lips to her brow, murmuring "God bless and keep always, mother, dear," and strode to the door.

Sue was waiting for him in the hall. He took her tenderly in his arms and she started to weep with joy and tenderness.

"Oh, Willie! do not go! I fear nothing for the opinion of the world. Stay, and I will prove to you how true a woman's heart can be."

He put her clinging arms from about his neck, whispered "wait a few years, darling. It may be that God will bring everything right, good," and was gone.

Mr. Evermond was shrieking in the parlour and the servants were busy attempting to quiet her found them hastened to the task, and sent for Sue. During that whole day Sue sat on one of the sofas, and she devoted all her time to the faded notes of the fashionably nervous mamma.

This happened five years before the time which I write, and Sue was as beautiful as she was virtuous.

All this time had waited patiently for some word of love or hope from Will; but none ever came and she had almost given up hope.

Evermond had grown fretful and nervous since the death of her son, and upon this New Year's morning he was unusually irritable.

"There! go! I wish the beggars were all in Tophet! Ah, go, do the devil's work that beggar away. Box her ears!"

"How do you know that it is a girl? Sue, smiling, as she rose to leave the room. 'Can't I tell every ring of begar in the city by their style at the bell?'"

Sue followed Ann to the door, arriving in time to hear a timid little voice say: "Please, mamma, I cannot go away until you speak to the mother who is dying and I must see her."

Kansas Coal and Mining.

The following extracts are furnished by the Kansas Commission of Labor: One of the most important...

When old Jasper Settles, of the White Sulphur neighborhood, reaches home and relates his experience, a certain fashionable church will look upon as a hot house where...

Another class must be "shot," as it is called, altogether. This was paid for digging the "helge," as it is generally found in the narrow veins, which it is much more inconvenient to...

The average price in summer and fall is 21 cents. The only other cause of a reduction in the price of summer coal seems to be to induce consumers to purchase when the demand would be less, so that the coal may be kept in operation more constantly than they otherwise would.

But whether the loss sustained by the miners is to be made up by the consumers, it is a well established fact that only a very small percentage of consumers can afford to invest in coal, and therefore they are actually in need.

The total amount of capital invested in the coal mines of Kansas is \$1,238,450, an average of \$166.40 per acre. The average annual earnings were \$270.45, from which \$60.64 must be deducted for taxes and other expenses, leaving \$209.81 with which to support their families, an average of four persons.

Latest Decrees in Dudedom. The law in dudedom which ostracizes and humiliates the worker, is a rule to hold as fast as ever. Upon the streets are beginning to be repealed the familiar spectacle of duds without hats, and the workers are actually in need.

The dying woman opened her eyes and whispered: "Sue! I did not expect you would come after had so disgraced me; but I did want father to take care of Willie. You are too good, dear Sue!"

The dying woman reached out her hands with one convulsive movement. She grasped the weary life upon her breast, and the weary life of Nellie Evermond was dead.

Among her few papers were found a letter from a young man, a young man who had lured her from her home, never deserted her, and at her entreaty had taken her to her native land to die.

Mr. Evermond called the body of his misguided daughter to be buried in a costly casket, and it rests now beneath the sod in the cemetery.

As Sue entered the house after her visit to the wretched home of Nellie Evermond, she found her mother, a greeter, and a well-known friend hastened to meet her. Will Evermond had returned.

He had returned, but the man whose hands he had fastened upon himself, and from his dying lips he heard the confession. He hastened to his mother's bedside, and his mother, who had died, was smiling, then started for home.

With full faith in Sue's truth, his mother died joyfully, for he knew that it was to call her home. That he was hastening homeward.

"Sue, I have come back free from the imputation of guilt. Lowering the voice, he whispered: "Has my darling been true to our oath all these years?"

"Thank you, she wept because of her son's joy, and for an answer bid her blushing face upon his broad bosom. Two months later there was a brilliant wedding at the residence of the Evermonds, and gentle Sue stood beside Will Evermond, perfect in her love and love.

Antelope and Cold Weather. Among the novel sights to be seen in London is the antelope. It is a species of that great breed of antelope, some of which has been about London for many years.

The "Wire Fence Man." The "wire fence man" is a new vocation. The farmers, his wife, and his children, are all engaged in the business of wire fencing. It is a new vocation, and it is a new vocation.

A Short Sermon. There are times when you are brought to realize that you stand on the shores of mysterious eternity. You are brought to realize that you stand on the shores of mysterious eternity.

He Cried Out.
