

Entered at the post office at Birmingham, Mich., as second class matter.

Since sympathy for negroes became the fashion no law is now so well-grounded by the law as this man's who has seen another from home.

STREETERED long in high places, this "Baby King of Spain" is the thinnest of skin. His mother is still a girl, and she may overtake him.

Writing a book, painting a picture or bringing up a child are only different ways of spending time. In all of them we are influencing mind and shaping character.

Hanckel's memory of those who have kept themselves unspotted from the world—yet more honest and more dear the memory of those who have kept themselves unspotted in the world.

PANAMA CANAL shareholders are like the dog in the manger. They didn't get their teeth drawn, but the leather is still there, anyway. You can't do it to the Nicaragua canal diggers.

To find a master's nickel because he quibbles his price and matters in his ear that he wants one is not charity, and the act of giving will not do you or him any good either in this world or the next.

CAMPUS CAPITULATION.

DURHAM, N.C.—Dr. J. Campbell Walker, president of the University, has resigned to be accepted as a son-in-law to Senator Zebulon Baird Vance, chairman of the state central committee, with some satisfaction.

PERFECT will never be reached, so let us begin to perfect our institutions. It often fails to do this, themselves honestly and reluctantly, their laws, is perhaps the nearest approach to perfection of such men and nations are capable.

Poor ROBERT, who doctored the Masterchess system of learning languages, and who speaks fourteen tongues fluently, has become a naturalized American citizen. His next move will be to attempt to learn perfect French.

The English would read my wife if they knew me now. Sir Justice Brougham is a good old dame of time to the study of American literature. He says that he had no realization of the richness and variety of the word of our men of letters.

BILL HILL, on a visit to Philadelphia, called upon a well-known music lover, while he was asked to write in an autograph album. He did so, and, among others, wrote the following: "Weber informed, it is really much better than sounds."

A CLEVELAND chemist is that people who use cocaine lamp for a dozen years become so perverted with the oil that their bodies after death scarcely need any embalming fluid to preserve them. That chemist is evidently undergoing to embed his self-life.

A new style of hair has been patented. The short "la-sag" in sections, with elastic cushions between and rivets connecting the sections, making a shoe in which there will be a veritable spring or spring, avoiding shocks or jar to the horse as he travels along hard pavements or roads.

The only evidence of the existence of the "angel" is that he gave himself for a Dr. Dingley. "Money for all things" are comparatively easy to give away; but when a man makes a gift of his life and practice, it is plain that there is something more than just a desire to hasten possession of his wealth.

ASKING for a loan, a young man in Jeffersonville, Ind., is probably the only farmer in the union, perhaps in the world, who devotes all his time and territory to the raising of butter beans. He owns a small place and has on his farm grown the butter beans, resulting a comfortable living.

THE ROMANCE OF PAULINE, by Mrs. "The fountain pen" is a great institution, but not one of men pen who are not used to it are utterly lost if they don't understand within reasonable dimensions. With pine pens out of ten the instant must be within disposable dispensing distance or there will be no ink.

AN AMERICAN woman, who had been in France six months, was only too pleased in that whole country, and those were in Paris and had no upward crest. The pie was about the first thing in which the Parisians lapped in America, and we believe that it has done its full spout towards making this the greatest nation on the globe.

DR. M. S. COOPER, of Cincinnati, left his horse mated and it ran away. The doctor sent messages over town and had about given up all hope of ever seeing his rig again when he was called to the telephone. He recognized the voice of his affianced, and was rejoiced to learn that the animal was standing patiently in front of her residence.

In the other day, when heretics and witches were burned, drowned or flung from cliffs, it never occurred to those engaged in the work to shut a woman up, up together in a cell, dark, and without window, for her to stand on. For this they had no mice to kill their victims all of a sudden.

The population of mummies is quite large. Anna E. Edwards says, "no one can think that the field of Egyptian exploration is limited; it is probably unlimited." Authorities are of the opinion that in 20 years nearly 500 million mummies were buried, and thus hundreds of thousands of buried cities and temples yet remain to be discovered.
