A GREAT MAGAZINE

SOUTHFIELD SIFTINGS. PROPERTIES OF GOLD. The death of Frank Young occurred at the residence of his father. October 29, at the age of 33 years. He has long been a sufferer from consumption and leaves a wife, parents and brother to mourn his loss. The deceased was a member of the United Presbyterian church and the pastor, Rev. Mr. Orr, condusted the funeral services last Saturday afternoon.

HISOTRICALLY AND POLITIC-

From an historical and political point of view, gold is jerhaps the most interesting of all methods the most interesting of all methods in the most interesting of all methods had had not an interesting affects of the same six who could only just walk, think the history of the same six who could not just with the same six who could not just the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six or and the same six of the same six of the same six or and the same six of the

prolonging life.

It is astonishing how little attention is paid in general to this extremely remarkable metal, and how few per sons reflect upon the peculiarities which distinguish gold from all other substances, and render it so valuable in the arts. Let us giance at some of them how.

which distinguish goes roses with a distinguish goes in the water with a men and render it so valuable in the arta. Let us grance at some of them here. gold in a bellinat yellow, when the metal is pure it is nearly the crange-yellow of the Soals spectrum. When it contains a little silver, and when alloyed to a little silver, and when alloyed to a little copper, it takes a reddish hue. We do not always see objects prewind the silver which light which false upon them is composed of the seven time of the solar spectrum (or rainbow) and when a body redects polium ight, for complete in a first ripheticity; och the light redected from a metallic surtable light sedected from a metallic surtable in the light redected from a metallic surtable in the sight redected from a metallic surtable in the sight redected from a metallic surface is mixed to a contract with a second of the seven in the sight redected from a metallic surface is mixed to a contract with the sight redected from a metallic surface is mixed to a contract with the sight redected from a metallic surface is mixed to a contract with the sight redected from a metallic surface is mixed to a contract with the sight redected from a metallic surface is mixed to a contract with the sight redected from a metallic surface is mixed to a contract with the sight redected from a metallic surface is mixed to a contract with the sight redected from a metallic surface and t

ment the under pinc. Sole white light in the all shawbed, assiste it we color of the metal is seen. In this manner gold is cost to be of a bellitant to range costs on the seen of the color of the color of the preflow; lead blue &e.
