as to the discipline of her army, and France, who follows closely after her late conquerors, had both to learn something in their struggle of twenty years ago, and are using their lessons now in the training of their armies.

fair occupant.

If was once supposed that our ancestors were longer-lived than are we of this generation. Such, however, is not the case. We now live longer on the average than they did. There, is a larger per cent of old-people, both mee and women, in this country than ever before, and they live to be relatively either than did our grandparent. Human life is this prolonged in multi-off the second of the control of the con

than did the old people of the past.

The experience had with the attempt to check Italian and Slav immigration does not leave us ground for firm faith that the legal barriers will prevent the country from being overnuby Mosions Deegraw. There is a bettle cure for this evil in the return by Mosions for making professional mendicancy a misdemessace and providing the mendicants with enforced wilding the mendicants with enforced and authority community has the local authority of the community of the contractors used as consenter such as comes here to beg one such as consenter such as comes here to beg one such as consenter such as comes here to beg one such as consenter such as comes here to beg one such as consenter to be good to be a large volume, each section could and work for it in making good reade until the immigrants perceived the encessity of finding work for the maxing contracts.

A BAD MAN'S END.
