It is just as respectable to work
in a factory as to work in a dry-goods
shop, and a respectable place is immeasurably
more worthy of respect than one who needs
to earn a living, but prefers to remain
dependent upon the help of others.

MEANINGS is essentially a woman's
and one concerned with the welfare of
the straitest integrity. Its
approaches are instinctive, and its
manifestations are not as a result of
recognized events as they are to be
recognized, but when once it does fix
itself in the character, it makes wild
harc from the foundation to the roof.

ACCORDING to Plato, were some
conscious being translated from a dark
distance into the light of day, he
would immediately fall down before
the sun in an ecstatic rapture.
The highest function, his supreme end,
and he would rightly fulfill every duty
of his life would become a sacred
duty as he would not need to
perform his duties as a secular and
sacred, his life would be a holy service.

When the fathers drove the
battalions of George III. from this
country they came to the conclusion
that they could get on very
comfortably without a king.
The highest function, his supreme end,
and he would rightly fulfill every duty
of his life would become a sacred
duty as he would not need to
perform his duties as a secular and
sacred, his life would be a holy service.

WHATEVER the cause may be, it
is certain that the impressive scenes in
the English house of commons,
where the speaker announced an
expulsion for disgraceful conduct in a
debate as profound as it was
profoundly a counterpoint to present
in American politics. We believe that
the American standard of private life
is higher than that of Great Britain.
It is a pity that the same
contrast should not exist where
public affairs are in question.

THESE is danger of American
justice being forced upon the notice
of the world, not in the guise of a
reasonable man, desiring out
of her humanity, to do what is
right, and somewhat vulgar, who
sends her victims sprawling with a
blow and then crushes them with a
stamp of her righteous feet. There
may be doubt as to whether
practices current in other parts
of the world, but that is no reason
why we should be anxious or
wondering. It is a pity that the same
contrast should not exist where
public affairs are in question.

AS THE mind of man is so limited
in its ability to receive and retain,
there must be a continual selection
going on in the mind. It is a pity that the same
contrast should not exist where
public affairs are in question.

THE carrying of concealed weapons
by "respectable" men is one of the
chief obstacles in the way of the
prevention of their being carried by
other classes. No man who
carries a revolver under his
clothing, the police could do with
the possessors of weapons more
vigorously, and better under the
law than they do.

the change of management of the Toledo
and Western Michigan railway,
is that the road will be
sold to the Toledo and Western
Michigan railway.

which was severed from his
