

WEDNESDAY & MITCHELL
BANKS and all other banks in Birmingham, Mich.
a second class matter.

We degrade life by our follies and our
vices; and then complain that the
unpleasantness is inherent in the constitution
of the matter.

One of the greatest drawbacks to
the progress of the nation is that
the conditions in which we live are
not safe to make a prediction that
the business people know just about
about it as the prophet.

When any line of product is abundant
in the market and sellers do not
profit the best way to avoid the effects
of these conditions is to make a little
better quality of these things and
in a little better and more attractive
condition.

The great body of parents do not
stop to think that a plan for the
education of their children should
be made for the schools and leave the rest
to the educational authorities reserving
a free right of criticism in anything
neglected or improperly done.

If there is any single question
which more than all others should
be considered now and forever, it is
that which involves the ownership
of property, and the rights of owners to
do as they please with that which they
have accumulated or acquired.

Great praise is given to the Japanese
because they are only 1000 years
in the empire. As oriental nations
have queer ways of dealing with
some questions it might be well to ascertain
precisely what they do do and
then to see if we can do better.

There is a great deal of talk
concerning the education of the
college graduate doing anything
of great importance, that the college
graduate has a high rank in the
order of civilization.
