Refugee moves with a London hand and strikes with a Birmingham hand.

What this country really needs is a telephone that is not busy all the time.

Every well-regulated public official prefers Chinese diners to Chinese dinners.

In these hell-tormented days of the arm of the sword is most interested in girls and the man.

The only military achievement of the Chinese soldiers is of recent date. They have finally managed to catch their breath.

Miss Chestnut, the president of a "college" in Mingo, Okla., resents the suggestion that there is anything peculiar about her.

There was another crank at the white house last week. The supply already being fully equal to the demand, he was not admitted.

"Women look much better with their hair in the theater," says the Boston Globe. And men look much better. It is better all around.

If the bullet Jim Hung Chang carries in his cheek came from a twentieth century pistol it was hardly worth while to prove it, anyway.

Two to one that woman who burst a breast-needle while preparing her hair for a full day's work had passed through dozens of barber counter razors unscathed.

Ten of the eleven of the New York police officers who have been indicted for dishonesty have pleaded not guilty. It is eleven months since the charges were made out of them.

The people are undoubtedly sick of the self telephone monopoly, but the other monopoly organized on the same plan would be equally objectionable.

Occasionally Wilde has been deprived of his usual yellow carnation and his limp white tie, and has been seen ready to give him a tannet jacket.

According to the new calendar they are 2316 students at the University of Michigan, of whom 2300 (including the women) are candidates for the variety football team and incidentally for a degree.

The twelve thousand public schools in New York state are to be supplied with American flags. The state has exhausted the supply of bunting, but it will increase the supply of patriotism in the Empire state.

Four hundred Irish girls came over in one ship last week to take places in factories as domestic workers. There is one industry in America not crowded with and cooking schools in every city as still continuing to employ them, but all our cooks and domestic servants, while American girls seek the stores as clerks to starve on small salaries.

Before Spain inflicts medical penalties upon persons merely proposing to allow Cuba to withdraw from the Spanish connection she ought to allow herself to put down those who proceed to fight in rebellion without waiting to talk about it. England is getting ready to let Congress go because it costs too much. Spain may yet find it costly to opt with Cuba.

A magazine writer says the Chinese article of war says: "First, prepare to look three; second, look twice; third, approach the enemy; that may be regarded as set down for the purpose of arms, but in practice the Chinese soldiers add two others, to wit: 'Strike the ship out fifth, the enemy's strike, and strike one two and three, and strike in on number four.'

Gov. Mitchell, of Florida, calls things by their right names when he discusses pricing. He has recommended to the legislature the enactment of a law making fire fights or glove contests felonies by statute, "with such penalties attached as may be deemed things to respect the law-abiding, God-fearing people of the state in the pursuit of their rights as citizens."

The republic of France does not propose to allow people to hang on to the titles without paying for the privilege. The republic is to pay for the titles, and the republic is to pay for the titles.
