Where did you get that hat? At Nixon's, of course. Last Saturday about 50 hats were sold at that popular store, and we do not wonder, for Mr. Nixon now states that he has 1,000 hats to be closed out at 33 cts. on the dollar. Think of that! Say, would you believe it? We are confident that all who saw that special electric car one day recently laden with packages from stem to stern, pulling out from W. H. Elliott's immense store in Detroit, realize that it was a vivid reality and "no dream." Birmingham people know a good thing when they see it and that is why they are flocking to Elliotts by the dozens and carrying away a cartload of merchandise at each trip. W. H. is the same old reliable as ever and he is a winner.

We have been informed by State Agent Pifer, of the Cincinnati Goffin Co., that Chas. Quick, of Royal Oak, has the best funeral outfit in Oakland county and we do not dispute the gentleman's statement, for we have never seen a more beautiful funeral gear. Did the hoodlums from the south end of town and the rural district adjoining, who occupied the gallery stage of the Presbyterian church last Wednesday evening, ever attend an entertainment before? If not that in a measure accounts for their outrageous actions. It is hopeful they will soon become accustomed to public gatherings and not disturb everybody present by their heathenish conduct. Had they been children they might have been sent home to their mamma's, but as they claim to be young ladies and gentlemen we would like to see them behave as such without chastisement. Why did not some good Presbyterian brother call them to order?

Tuesday afternoon Mrs. A. Z. Chapman, a well known resident of Southfield succumbed to the dread disease consumption. Although she had been in poor health for a long time it was only very recently that she had been obliged to keep her bed, and had it not been for late hemorrhages from the lungs she might have been spared for some time yet. Her age was about 60 years. She is survived by a husband and a large family of children, who have the sympathy of many friends in this vicinity. The remains were taken to Greenfield Thursday morning for the observance of funeral rites and brought back to Southfield for interment.

The Express Co. will be called upon to pay for a lost pony. This is a funny loss. It happened in this way G. A. Watkins' foreman, J. H. Myers, started a pony in a crate on the mail west at noon Monday. It was placed in an empty baggage car with the door open. At Pontiac it was found that the pony had broken out from the crate, snapped his halter and disappeared into the mysterious nowhere. Search was made on foot between our town and Pontiac, but no trace of any kind could be found of the sheltland pony and at this writing it is still "non est." Why it wasn't killed outright when it jumped from the car is a wonder and to know it was able to get out of sight is still more wonderful. Later—Found at Tanglewood farm all right and ready for more.

John Hanna is not exactly "painting the town red," but he has recently adorned his business establishment with an abundance of that popular color. It looks nobly, to say the least, John.

An expert says the mystery of the sinking island at Orion lake is caused by the specific gravity of the mass normally being a trifle heavier than water it naturally sinks to the bottom. As the rich verdure of the weeds approaches maturity, however, and decomposition of them is aided by the increasing warmth of the water during the summer season, the gases arising from this decomposing state, being retained in the plant cells, overcome this normal gravity of the island and so the whole mass slowly emerges out of the water. With the coming of cold weather, the vegetable growths being destroyed and decomposition checked, the mass again becomes heavier than water and gradually disappears. The water near the island is about 30 feet deep, so that the growth of vegetation cannot well be from from the lake bottom, at least this is the opinion of those who have examined the island the at various stages of its submersion.
