# A TALK WITH MRS. PINKHAM

About the Cause of Anemia. Everybody comes into this world with a predisposition to disease of some particular kind. In other words, everybody has a weak spot. It is a weak spot in the system. The uterine organs have less vitality to disease than the vital organs; that's why they give out the soonest.

Not more than one woman in a hundred is in a healthy condition of her system. This points to the stern necessity of helping one's self just as soon as the life power seems to be on the wane. Excessive menstruation is a sign of physical weakness and want of tone in the uterine organs. It saps the strength away and produces anemia (blood turns to water).

Look up the bright side of your condition; then your discontents will disappear. First, and take advantage of your health, but resort your meekness. Who are infirm, there is a class of people who are often called the "old maid" class. They are women who have never been married, and they are often called the "old maid" class.
