Weekly Crop Bulletin.

In the weekly crop bulletin issued on the 26th, Director Schneider, of the Lansing station, discusses crop prospects as follows: The continued low temperature and especially the cool nights, have greatly retarded the growth of corn, otherwise the weather conditions of the past week have been very beneficial to all vegetation. Light rains have occurred and relieved the droughty condition in the upper peninsula and the northern counties; in the southern counties showers have slightly interfered with haying and cultivation. Corn has generally made a good stand and continues to look healthy, although its growth is very slow. Oats are in fine condition and heading in southern counties. [illegible]

Mrs. Pinkham

The one thing that qualifies a person to give advice on any subject is experience—experience creates knowledge.

No other person has so wide an experience with female ills nor such a record of success as Mrs. Pinkham has had.

Over a hundred thousand cases come before her each year. Some personally, others by mail. And this has been going on for 20 years, day after day and day after day.

Twenty years of constant success—think of the knowledge thus gained! Surely women are wise in seeking advice from a woman with such an experience, especially when it is free.

If you are ill get a bottle of Lydia E. Pinkham's Vegetable Compound at once—then write Mrs. Pinkham, Lynn, Mass.
