

To Mothers of Large Families

In this workaday world few women are so placed that physical exertion is not constantly demanded of them in their daily life.

Mrs. Pinkham makes a special appeal to mothers of large families whose work is never done, and many of whom suffer, and suffer for lack of intelligent aid.

To women, young or old, rich or poor, Mrs. Pinkham, of Lynn, Mass., extends her invitation of free advice.

When I want to know how to get well, I go to Mrs. Pinkham's Vegetable Compound.

Several families told me they could do nothing for me. Thanks to Mrs. Pinkham's advice and medicine, I was now well on my feet.

It is so well known, I think I can say that I have written to all mothers with large families.

To forest to wind a wish, a woman sign your name getting well.

DIFFRACTION GRATING

What Gives the Spectral Shift Its Beauty? Of all the delicate and wonderful instruments invented by scientists there is hardly one that is not duplicated in nature.

However, ingenious it may seem, and however beautiful it may be, Nature generally has its counterpart hid away somewhere.

When the astronomer began to analyze sunlight they found that it was made up of many different colors.

A plain bar of white light passing through a prism was broken up into a very rainbow of colors.

Each separate color was found to represent a chemical element—iron, sodium or some other ingredient of the sun's composition.

But this did not give the astronomer fully what he wanted.

He wanted to see the colors of the spectrum as they appeared in nature.
