QUESTION ANSWERED.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers and grandmothers never thought of using anything else for Indigestion or Biliousness. Doctors were scarce and they seldom heard of Heart Failure, etc. They used August Flower to clean out the system and regulate the action of the liver, stomach, and bowels, and that is all they took when feeling ill and had with head-aches and other aches. You only need a few doses of August Flower in liquid form to make you satisfied. There is nothing wrong the matter with you. Sample bottles at Whitehead & Mitchell, N.Y.

Merchant Fleets

The statement made in connection with the announcement of the formation of the Leyland Line by J. Pierpont Morgan, that it was one of Great Britain's greatest, although it was not at the time as a surprise to many people. The name was an unfamiliar one. The Leyland line is only one of several great fleets which have been mobilized to meet the demands of commerce. The fleet of the Leyland line, according to Whitaker, ranks seventh in point of tonnage, that of the Hamburg-American line being first. The Hamburg American line has 24,000 tons of tonnage, with a tonnage of 24,000 tons of these, however, a large number are river steamers, tugs and lighters. The steamship number alone has a capacity of more than 500,000 tons. The second fleet in point of capacity also flows the German flag. It is the North German Lloyd line, with ninety-one ocean steamers having a tonnage of about 700,000 tons. The third company rank next, the British India Steam Navigation company, which has more than 100 vessels and a capacity of about 700,000 tons. The fourth and Oriental with a fleet of more than sixty vessels and a capacity of about 600,000 tons. The fifth is the Messageries Maritimes, which has the sixth place, although in point of tonnage it does not exactly exceed the first and the second. The seventh being owned by the Hamburg-American line. A line being the first in the world, it is not surprising that it should be the first in the world. Perin Has No Summer Home

There is no rain in Persia during the summer months, and the land is barren except where there are streams of water for irrigation. The mountain streams are conducted in an underground system of aqueducts, and are brought to the surface by means of a system of water-lifting. The water-lifting is done by means of a system of water-lifting.
