Something About Typhold Ferre Germa.

In a great many places in Michigan there are, a large number of typhoid fever cases, and in some places it amounts almost to an epidemic. The physicians arge the greatest care to prevent the Gesawa getting a foothold. The State Board of Health has issued a circular giving the public directions, and the following supplemental facts are valuable at this time:

Typhoid fever used to be known as autumnal fever. Its name was derived from the season which brings in the createst prolation of fruit or vegetables. Lavish in ber boant, nature remorselessly unsibse humanity for its abuses. No tood is more wholesome than fruit and egetables when ripe, sound and scientificially prepared for consumption. Not of the season which deed the season when the control of the season of the season of the season which is more wholesome than fruit and excitable show readily than unripe or unsound fruit or vegetables.

Nature never intended that the outer was the season of the season

nutrition.

On the contrary the outer coat of every
fruit or vegetable reeks with microscopy
germs or larger ones, which are noxiou
in the human mouth or stomach. Their
outer coals are meant to protect the in
urr substance from injury while ripening
for human benefit, or delivery.
