SOFT CORE

Like the running brook, the red blood that flows through the veins has to come from somewhere.

The springs of red blood are found in the soft core of the bones called the marrow and one may red blood also come from the spleen.

Scott's Emulsion makes new blood by feeding the bone marrow and the spleen with the richest of all fats, the pure cod liver oil.

For pale school girls and invalids and for all whose blood is thin and pale, Scott's Emulsion is a pleasant and rich blood food.

It not only feeds the blood-making organs but gives them strength to do their proper work.

The predictions of the weather prophets in this neck of the woods as to the coming winter are almost unanimously to the effect that a long and hard winter is before us.

The Indians' forecast, however, is more comforting to the man who hasn't his winter's coal supply in it. The coons are all lean, says Lo, and the muskrats are not building houses, therefore an open winter is on the bills.
