You can never make a man believe that he won't hurt his son's morale to do a thing more than he hurt his wife when he did it—New York Press.

Wis is the bald-headed individual who fully realizes that he will never grow on his cranialium.
Many a man neglects his own chances with life by being out what he would do if he had some other man's chances.
There is one redeeming feature about the man who laughs at his own jokes. You at least know that he intended to be funny.
BRET HARTE'S ESTATE.
Bret Harte left \$1,800 and a name that is sure to live—Boston Globe.
Bret Harte left \$1,800 and a name that will possibly outlive Mr. Schwab's—Milwaukee Sentinel.
Mrs. Anna Soberholm, of Ferguson, Pa., Minn., fell and dislocated her shoulder. She had a surgeon get it back in place as soon as possible with the use of a special plaster her very much. Her son mentioned that he had seen Chamberlain's Pain Balm advertised for sprains and soreness, and she asked him to buy her a bottle of it, which he did. It quickly relieved her and enabled her to sleep which she had not done for several days. The son was so much pleased with the use of it, gave his mother that he has since recommended it to many others. For sale by Whitehead & Mitchell.

London cable. A special dispatch from Pekin says the censor's office has memorialized the dowager empress to resign in favor of her superior as the first step in the policy of reform.
Issues Requisition.
Springfield, Ill., special: Governor Yates issued a requisition for the extradition of Albert E. Lyford, former assistant attorney general of the Rock Island county, who is under arrest in Illinois territory.
Washington special. The president wrote "disapproved" on the findings of the military court-martial which acquitted First Lieut. E. A. Wickman, accused of water cure practices.

SCIENCE & MECHANICS

No insect is so dreaded in Africa as the tsetse fly, the bite of which is fatal to horses. The only effective protection to the horse is a complete suit of pajamas, which are largely in use in the tropics of which the pajamas are made is strong proof.

Dr. Calvein, an Italian, has discovered that nine per cent of the weight of the human body is composed of water and eighteen per cent of fat. He has discovered an excellent food for the human body, for the purpose of medical operations. As these operations are largely in the composition of water and fat, it follows that this food is the most appropriate for ordinary purposes.

In his experiments with various vehicles, M. Michels has discovered that the electric motor is more powerful than the steam motor or the gas engine. In his experiments with various vehicles, M. Michels has discovered that the electric motor is more powerful than the steam motor or the gas engine. In his experiments with various vehicles, M. Michels has discovered that the electric motor is more powerful than the steam motor or the gas engine.

For shallow draft steamers, both side-wheels and stern-wheels have disadvantages, especially in the weight of their machinery, while propellers as they are used in the fixed tunnel, lose efficiency through the funnel's opening. In a new English propeller boat for shallow rivers, the stern end of the tunnel is made adjustable by a hinged flap. Raising or lowering the flap keeps the opening just below the surface and it is claimed that with moderate load the gain is twenty five per cent.

The search for a welding process for aluminum still goes on, in spite of the claim of several investigators that they have discovered a practical solution of the problem. One of the latest is that of Mary W. Emme, of New York City, who has discovered that the reaction may be attained by the use of two contrasting clips of aluminum under suitable conditions approximately to or above a temperature of 600 degrees Celsius. To carry it out, a piece of aluminum weighing ten to twenty grams is placed in a test tube with a piece of aluminum which has never been subjected to separation.

The London School of Tropical Medicine has discovered a new parasite which is the cause of a tropical fever which resembles malaria, but which does not yield to the same treatment, and is generally fatal in its results. The parasite does not inhabit the corpuscle, like the malarial parasite, but is free in the blood current. The parasite, which is the cause of elephantiasis, is free in the blood current, and is generally fatal in its results. The parasite does not inhabit the corpuscle, like the malarial parasite, but is free in the blood current.

The promises of economy gains from burning pulverized coal have for years led to persistently recurring experiments, and each new venture in the field has been heralded with claims of final success. After all, however, experience in every instance seems to have ultimately demonstrated that it is difficult to obtain combustion of such fuel with so small an amount of air as a whole, and there generally some intractable, and only more demonstrates the wisdom of establishing such a school of medical research.

SOME CUTTINGS.

"Prison Chaplain—"My friend, aren't you sorry you are in here?" Prisoner—"No, sir, I'm in here for having five wives."

"Mistress—"Are you not rather small for a nurse?" Nurse—"No, indeed, madam. The children don't fall so far when I drop them."

Bertie—"Are you dining anywhere on Christmas day?" Appley (eagerly)—"Thursday—no." Bertie—"How hungry you'll be on Friday?"

"There isn't anything romantic in the treatment, doctor," said physician, "you can never be beautiful or keep good looks unless you eat well."

"Dora," implored the young man, "if you would only assure me that you love me, I could go forth and fight the world." "Well," replied the sweet thing, "if you feel like that you might begin by breaking the news to papa."

Heads Should Never Ache. Never under this trouble. Use at once the remedy that stops it for Mrs. N. A. Webster, of Winona, Minn.—she writes "the King's New Life" which cured me of six headaches I had suffered from for two years. I am now well and happy. Consultation, Pillsbury & Co's drug store."

The Kentucky distillers have decided to organize and carry their own insurance. Now, suppose the insurance companies should get together and make their own whisky?

Love, like genius, is not an integral part of character; it is a gift, an inspiration, direct from heaven.

As a rule of life, one finds that the truth lies somewhere between first impressions and final decisions.

STAFF OF MICHIGAN. (In a session of the Executive Council of the State of Michigan, held at Lansing, Mich., on the 10th day of December, 1910, the following members were appointed to the staff of the State of Michigan: Joseph S. Stowell, Judge of Probate, and over population.

MONEY IS MADE EASIER IN LARGER CHUNKS

Comes Steadier and for More Years, in a Good Mine

Developed and operated under honest and efficient management than in any other legitimate investment. More people in the United States are receiving steady incomes today from big and little investments in mines than from any other one business. Nature has deposited untold wealth in various forms on mother earth and it is legitimate for the sons and daughters of men to join finances large or small in an honest corporation to obtain these riches.

The Cadillac Mining Company, whose announcement has appeared in this paper for several weeks, is just such a corporation. The investor, big or little, man, woman or child, will receive honest treatment—every share of stock drawing as large dividends as any other share. The property of the company in Yavapai County, Arizona, comprising 140 acres heavily mineralized, is no longer a "prospect" but is a "mine" proven to contain immense bodies of ore, rich in gold besides great values in silver, copper and lead. The developments in our 110 foot shaft and in nearly 100 feet of drift at 100 feet depth have been through solid ore nearly all the way and there is now on the dump from 400 to 500 tons of splendid ore awaiting the crushing mill. The development work is going on day and night.

Five prominent citizens of sound judgment and unimpeachable integrity, Mr. Ellifrage F. Bacon, Mr. Fred C. Pillsbury and Dr. Douglas Long of Detroit, Mr. James E. Whalen of Sault Ste. Marie and Mr. Frank H. Sherman of Pontiac, visited the mine in October and vouch for the above statements and much more. A small allotment of stock is now offered at 20 CENTS per share, payable in cash or installments of one-sixth down, balance in five payments. You had the chance to buy it at 15 cents. They let this chance go by—subscribe now. This advance in price is entirely due to increased value in the property owing to developments. The next advance may be within a month.

Send for prospectus giving assays and full information. Ask the proprietors of the Economic their opinion of Cadillac. **Cadillac Mining Co.** NEW OFFICES 839-840 Majestic Building, DETROIT, MICH. Phone, Main 1803.

UNTIL MARCH 1, NEXT

A FIFTY-CENT MAP

Free! Free!

All Eccentric subscribers who pay arrears and one year in advance will receive the best offer ever yet made to any subscriber. THE TUNISON'S NEW INDEXED WALL ATLAS OF OUR STATE, NATION AND GLOBE.

We are furnishing FREE to our readers the President's Message to Congress something that is far and away the best thing ever offered by any newspaper. By special arrangement with the well known Chicago atlas publishers, we now offer FREE to all our readers. Tunison's New Indexed Wall Atlas of Our State, Nation and Globe. Size 3 feet and 2 inches long by 2 feet 6 inches wide. Printed in 5 beautiful colors and wide mounted with Japanese Rods, ready for hanging in any office, home or school. This splendid new map will be appreciated by all for ready reference. It undertakes to show every post office box and plain, from latest government reports with a quick leader to Postoffice and Counties to date, giving the population of each from latest census and over population.

THE UNITED STATES—Is a new and correct map of Our Nation in 5 colors from new plates and has marginal tables giving name and population of cities having 3,000 and over population. THE MAP OF THE WORLD—Gives "All the Nations of the world in a moment of time." Shows "Our New Island Possessions" marked "U. S. A." with steamer routes and distance from port to port, also the International Date Line, the Ocean Currents, and "reverses in the seas" and 100 man numbers giving the exact time of day at each place on any meridian, when it is twelve o'clock noon at London.

ENCYCLOPEDIA—Tunison's New Indexed Wall Atlas of Our State, Our Nation and Our Globe, contains a wonderful table giving the correct and official answers to 1,000 important questions in the past and present. It is a further reference to the Busy Man's Encyclopedia, a 12-year-old work can give a more concise and complete knowledge of "What's What" than 100 out of 20 voters or office holders could give without it, or could be found by reading the President's Message to Congress.

DIAGRAMS—Tunison's Wall Atlas contains now an interesting diagrams in colors, of the Lagan Rivers with their courses, equines in miles, highest mountains with their elevations in feet, also largest lakes in all the world compared, giving area of each in square miles. Tunison's New Indexed Wall Atlas is given away FREE to all subscribers of THE ECONOMIC. FAR EXCEEDS A SCORE OF BOOKS. Tunison's New Indexed Wall Atlas offered FREE to all our readers is a compilation of facts and figures, furnishing information, geographical, historical and statistical. It is of value to any intelligent man of ambition, it is of value to any mother or father, it is of value to any student of the farmer for the intelligence it breathes about all the world. It is worth much to the man of war or peace about the picture of facts and figures, furnishing information, geographical, historical and statistical. It is a ready reference to the politician, the statesman, the orator, statistician, minister or educator, for the facts that can be gleaned from no other source in time so short. The business man needs it as he needs his ledger. The home needs it to show the children and parents alike. It is a ready reference that far exceeds anything else that could be gotten into a score of books of such a library as ours.

THE WORLD MOVES QUICKLY. New ideas and higher education stamp the literature with every succeeding production. Atlases and maps last year, or two or three years past, count for little and count less for this New Year approach. This is why Tunison's New Indexed Wall Atlas being the latest, has all the up-to-date creations. What does your favorite paper do? They give you this New Wall Atlas entirely FREE with the Economic.
