

missions, and bog conditions so greatly this mission was a constant to the financial species of Insects, that it may not be study and corrain, says builted in 13 of the constant of the const

In the ditch level, research to draw the ditch level and the level of the highest too of was the level of the highest too of was the level of the highest too of was the level of the highest too for a kertea sufficient to based water enough to flow at least the highest too groupletely. The impurctance of this requirement is so filling appreciated that miles of ditches lasse been dug in New Jerger to tag smaams at a higher level, and many across of swamp area have been creatived basins. In Massachiments powerful pumps have been installed to poser water directly upon the bog or latte a reservoir allows it.

CH Adjins thus levels so that the upper one of the series can be completely empth of into the one below, better the property empth of the the property empth of into the one below,

sail per have the gates and outlets as sidpasted that any one log may be completedly emptided without interfering with either those above or below. It haggess not infrequently that one bog sended celanify or other attention while others do not.

437 There's should be a broad, deep made a beginning or other attention while others do not.

437 There's should be a broad, deep made and a basel of the between the dam and land, and this ditch should be always clean and at least partly full of water. Many kinds of insects can be alto gather kept from the bogs in this way, while grasshouppers and other insects asce delayed until they can fly. The should be they are feeling on other things, and they are feeling on other things, and they are feeling on other than, and they are feeling on other than they are feeling and they are feeling as should be toplands should be kept as free as possible from vegetation that harbors examinerry-feeding aspecies. Cramberry wines should not be tolerated for an inext as had, and these should be long and upland join without an indicated as a should be allowed too learn the longs nor on she dams.

47, It follows from what has been

wants thousands of the wards of the second of the second where pack it is done in small quantities in one story jof the apple trade in a the story jof the apple trade in a the ben farage packing houses must be order of the day. Whether these traps packing houses are controlled by ocperative associations or by captaints who have alknowledge of the second was a story and the second was a story and the second was a story and the second was a story of the seco
