Never Outside This Home-Owned. Probably fewer United States bonds are owned outside of the country than those of any other first-class nation. The interest on the bonds here is a positive value to the national banks as a basis for circulation which raises the rate of interest to a point where they are able to do business on ordinary investments. The total of bonds held by foreigners is \$2,000,000,000.

WEST INDIAN SUPERSTITION. When a West Indian negro cuts his hair he always buries the severed hair in the ground. He argues that if he does not, the spirit of the body and therefore as much entitled to a grave as the rest of him will be.

To give the baby good luck they mark it on the forehead with a cross in washing blue or tie a blue ribbon on its arm. They will never, on any account, measure or weigh a baby for that means the worst of bad luck.

Don't say "If" more than once a day if you want people to think well of you. The trouble with some people is that they want their employes to work for them.

The average man's idea of good luck is to go to bed at night with the assurance of no work next day. We believe it is possible to overcome antagonism to anything sooner than to dislike of the word "environment."

True politeness does not consist entirely in saying "Good morning" frequently, and shaking hands as often as possible. In these troubled days of finding help it is correct to call a girl "an old family servant" if you had had her as long as three weeks.—Atholton (Kass) Globe.

No one should really hesitate on trying a box of PEPSIKOLA as it will not cost you a penny should it fail to relieve and cure the very worst case of indigestion, heart trouble, etc. Sold by Whitehead & Mitchell.

Why is a watch the most difficult thing to steal? Because it must be taken off its guard.

Not more than 11 per cent of the deaths from heart disease occur at ages under 45.
