Subsoiling Query.

From the Farmers' Review — Will it do any good to use a subsoil plow on a subsoil that will hold water? How deep should the plowing be? What is the best time of year to do the work? The soil is upland and in Okiahoma—Joseph Blodgen, Oklahoma.

She hates the hen who has an more Joseph Blodgen, Oklahoma.

The query was submitted to Prot. John Fields, director of the Oklahoma.

The query was submitted to Prot. John Fields, director of the Oklahoma.

The query was submitted to Prot. John Fields, director of the Oklahoma.

The query was submitted to Prot. John Fields, director of the Carlotte and the sale for the Carlotte and the sale for the Experiment Station farm is very lenetrates very poorly. The soil of the Experiment Station farm is very armalar in character and experiments with sub-soiling conducted several says and the waves of a pretty girl's handworth of submolling. The better plant labor of submolling. The better planting or seeding crop. Such methods of repearation result in excellent yields of wheat if the plowing is delayed until late in the fall, deep plowing usually results to flowing is delayed until late in the fall, deep plowing usually results in the fall of the plowing is delayed until late in the fall, deep plowing usually results in the fall of the plowing is delayed until late in the fall, deep plowing usually results in the fall of the plowing is delayed until late in the fall, deep plowing usually results in the fall of the plowing is delayed until late in the fall, deep plowing usually results in the fall of the plowing is delayed until late in the fall of the plowing is delayed until late in the fall, deep plowing usually results in the fall of the plowing is delayed until late in the fall of the plowing usually results in the plowing is delayed until late in the fall of the plowing usually results in the plant of the ould not advise subsoiling such for ordinary farm crops.

Breeding Young Cows.

An experienced stockman says:
Very thin and very fat helfers are alike undesirable for breeding purposes; what is desired is good conditions without running to either extenses. In regard to the sage at which sends on the above breen much observed in any way, it is advantageous to delay breeding two or three months, but twill rarely be found advisable to delay breeding later than twenty-four the sings a heavy buil upon young helfers for fear of serious injury to the helfer, for fear of serious injury to the helfer was send in cair all that is required is good feed and care till near sure starting point. Everythin sack to sure starting the help to good help in the sure starting the sure starting the first sure and surface of the helfer by feeding food suitable for milk production and given an abundance of clear, wholesome waster to drink. It was also shows and the sure starting the bready of the surface of the helfer by feeding food suitable for milk production and given an abundance of clear, wholesome waster to drink. It was also shows and the surface of the helfer by feeding food suitable for milk production and given the surface of the helfer by feeding food suitable for milk production and given the surface of the neighbour surface surface and the surface of the neighbour surface surface and the surface of the neighbour surface surface and the surface surface
