

SADIE ROBINSON.

Pretty Girl Suffered From Nervousness and Pains Caused by Found Faulty Habit in a Few Days.

THE GOSNANA BY MARY DEVEREUX WITH ILLUSTRATIONS BY DON C. WILSON Copyright, 1912, by Little, Brown and Company

CHAPTER II. Through the weeks of the late summer...

When the faithful old servant had left the room...

They saw the pale, angry face of Tomas Fauchel...

But the smile died softly in a sigh that was almost a moan...

When Webster wrote after continued provocation to the editor of a newspaper...

NERVOUSNESS AND WEAKNESS CURED BY PE-RU-NA.

Miss Sadie Robinson, 4 Bond Street, Malden, Mass., writes: "Peruna was recommended to me about a year ago as an excellent remedy for the troubles peculiar to our sex...

Address Dr. S. B. Hartman, President of The Hartman Manitarium, Columbus, Ohio, for free medical advice...

THIS WOMAN KNOWS

WHAT ONE OF THE SEX DISCOVERED AFTER HER GREAT JOY.

Mrs. E. De Long Finds That the Indescribable Pains of Rheumatism Can Be Cured Through the Blood.

Mrs. E. M. De Long, of No. 160 West Broadway, Council Bluffs, Iowa, found herself suddenly attacked by rheumatism in the winter of 1907...

"I was in bed half the time, suffering with pain that cannot be described to one who has never had the disease. I would concentrate sometimes in one set of joints. When it was in my feet I could not walk; when it was in my elbows and wrists I could not even draw the covers over my body...

Dr. Williams' Pink Pills furnish the blood with all the elements that are needed to build up healthy tissue, strong muscles and nerves, capable of bearing the strain that nature puts upon them. They really make new blood and cure all diseases arising from disorders of the blood or nerves...

On the Trail with a Pink Brand! Follow the trail to the mountains with the Pink Brand! Follow the trail to the mountains with the Pink Brand!

W. L. DOUGLAS SHOES... THE GREAT GRASSHOPPER EGGS...

quested for the bearer and his escort. The fact was that Etienne, recently named Tatro, the father, had been attending the meetings held by the peasants...

Jeah did not deem it wise to present himself until the dinner hour should arrive, but had passed the time in questioning Margot and Tatro as to the probable meaning of this strange invasion of the chateau's privacy...

"Truly it is, little Monsieur de So-to," answered Lieutenant Bonaparte, laughing as he kissed Jean's flushed forehead...

When they were seated the officer explained to Monsieur le Baron although in a way not to bring in the name of Etienne...

WHAT ATTRACTED THE CHILD.

Explanation of That Hurt Vanity of a Young Singer.

A certain well-known opera singer who has spent the summer in New York practicing, has heretofore been highly flattered by the utter absorption with her powers of execution...

"Is it thou, my beloved Pizarro?" in his element, and entirely at ease, rattled on after a fashion that recalled his father when any extra effort in entertaining his guest.

"How's this?" asked one of her friends. "How about that two-year business?" "Oh," she replied, "I have concluded that I'm entitled to eight months off for my good behavior. Same as I got in jail, you know."

The number of Spiritualists in the United States and Canada is surprising, when the figures of the National Spiritualists' association are studied. The various societies are rapidly increasing and it is estimated that more than a million and a half people in the two countries are keenly interested in Spiritualism.

"Not long ago," Nat Goodwin, "I was lunching with a friend and two grass widows, neither of whom had been divorced. 'One of the widows held up the wishbone of the chicken. 'Let's see which will be married first,' she said to the other grass widow. 'It seems to me,' remarked my friend grimly, 'that you'd better see which will be unmarried first.'"

Why John L. Doesn't Train. John L. Sullivan, in one of the vaudeville houses, was telling the story of his career. Someone in the audience asked him why he did not train down and take some of the flesh off his stomach. He replied: "I don't care to do that. If I could have as much fun taking off the flesh as I had putting it on I would gladly do it any day in a week."

A moment later his discharge of musketry could be heard. "The sergeant and his men had come upon the scene. Then the air was rent by more yells and imprecations, but with sound in them, respectful of the part of the surprised marauders.

A second volley rang out, and the officers' voices were heard. "Stand fast, men. Load and fire at will, or club your muskets. Teach these people a lesson—one in the name of the Assembly."

Those in the hall now saw a maning torch thrust through the window. It was held by Tomas Fauchel, who, with characteristic villainy, let fall some insinuations impeaching the latter's loyalty to the Revolutionary cause...

The light of his torch fell upon the uplifted face—white and stern—of the baron, who, saying his hand upon the musket which Lieboeuf was taking aim at the half-crazed fanatic. "Do him no harm, let him live."

Fuechel, who had heard the words, dashed across the hall, and, quickly extending his other hand, pulled the trigger of a pistol, as he tossed his torch into the hall and extinguished it with his foot.

"Alas!" he cried, precipitating himself upon his father's great musket arms went quickly around the boy's form. "Is it thou, my beloved Pizarro?"

AGRICULTURE

The Roots of Legumes. Recently in walking through a field in Illinois with Professor Hopkins, the gentleman remarked that the roots of leguminous plants differed very greatly as to their value when turned under, on account principally of the differences in their volumes. This is contrary to popular impression. The idea has been that all leguminous plants had large roots that supplied a considerable amount of matter to the soil when turned under. The professor had in mind the contrast between the cow pea and red clover. The roots of the cow pea contain three times as much manurial value as do the roots of cow peas.

Last winter we published a number of articles on the value of the cow horn turnip for fertilizing the soil, at least so far as the adding to the soil of vegetable matter is concerned. Cow horn turnips do not belong to the legumes, but it will be easily understood why some of our farmers think so well of them for plowing under in my heart, and I want to tell every such farmer that the manurial value in the cow horn turnip lies in the roots.

With most other plants it is far different, the great bulk of the fertility being in the tops. With alfalfa even deep rooter as it is, we find the value of its fertility in the roots to be only five per cent of the whole, or thereabouts. Of course proportion will differ as the crops differ in volume and the kinds of fertility in the soil in which they grow. We may say that about 20 per cent of the manurial value in the red clover plant is found in the roots. It is interesting to note that the manurial value in the roots of red clover and crimson clover, as to the roots in the former named plant has only about five per cent of the manurial value in the roots. Not knowing this, doubtless a good many men have raised crops of crimson clover and plowed under the roots with the impression that they were increasing the manurial value of their land. In the case of the crimson clover, the roots have to be plowed under if much good is to come from them.

In the tops are generally found the greater portion of the phosphorus and nitrogen. There is an exception in the case of red clover in which the great portion of the nitrogen is usually found in the roots. It must be understood that the proportions of the fertilizers found in tops and roots are rather very great fluctuations running in some cases as high as 40 per cent.

In the main the relative value of the roots of the plants is overestimated. The popular idea has been built up in some measure by the occurrence on the roots of the nodules that contain the bacteria. The tubercles are however so small a proportion of the whole plant that this is of little consequence.

Plowing Up Grasshopper Eggs. The eggs of grasshoppers are laid in clusters about an inch below the surface of the ground. Each cluster of eggs is surrounded with a frothy material which seems to act as a protection from excessive moisture. Plowing the ground where eggs are laid kills these masses and destroys the protection; in some cases it turns the masses down so deep in the soil that the young hoppers, even though they hatch, are unable to get away upward to the surface. Almost no grasshoppers will hatch in ground that has been plowed. Hence it is desirable to plow the ground where the eggs are laid, and to plow the ground where the eggs are laid, and to plow the ground where the eggs are laid.

If I could have as much fun taking off the flesh as I had putting it on I would gladly do it any day in a week."

One remedy for the disease was clean and neat, yet, through the buttermaker's antipathy to the use of commercial starters and an alkali test, he looked for quality rather than for quantity. The butter he made was dominated by the character of the feeds used to such an extent as to lose its quality very shortly. The buttermaker was a careful manager, the granular butter being washed out of the churn onto the floor and down the gutter. He made the management believe was unavoidable.—Prof. J. G. Moore.

Corn Intended for seed should not be stored on a shelf or on a floor, as in such a position the circulation of air is imperfect and the kernels on the outside are liable to mold. The corn should be placed on a rack. Seed corn when stored may appear perfectly dry, but if the moisture begins to work out of the corn, mold will appear on the surface unless the circulation of air is constant enough to dissipate it.

Two severe cases of Ovarian Trouble and two terrible operations avoided. Mrs. Emmons and Mrs. Coleman each tell how they were saved by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I am so pleased with the results obtained from Lydia E. Pinkham's Vegetable Compound that I feel it a duty and a privilege to write you a list of different women who have benefited by an unpleasant discharge, a great weakness, and at times a faintness would come over me which no amount of medicine, diet, or exercise seemed to correct. Your Vegetable Compound found the weak spot, and in my heart, and I want to tell every such farmer that the manurial value in the cow horn turnip lies in the roots.

Another Case of Ovarian Trouble Cured Without an Operation.

"DEAR MRS. PINKHAM:—For several years I was troubled with ovarian trouble and a painful and inflamed condition, which kept me in bed part of the time. I did so read a great deal of literature, but nothing seemed to bring relief until a friend had been cured of ovarian trouble, through Lydia E. Pinkham's Vegetable Compound. I took it faithfully for three months, and at the end of that time was glad to find that I was a well woman again. Health in nature's best gift to woman, and if you lose it and can have it restored through Lydia E. Pinkham's Vegetable Compound, I feel that all suffering women should get it. Mrs. LAURA EMMONS, Walker, Mass., Commercial Hotel, Nashville, Tenn.

It is well to remember such letters as above when some druggist tries to get you to buy something which is not as good as Lydia E. Pinkham's Vegetable Compound; accept no other and you will be glad.

Don't hesitate to write to Mrs. Pinkham if there is anything about your sickness you do not understand. She will treat you with kindness and her advice is free. No woman ever regretted writing her and she has helped thousands. Address Lynn, Mass.

\$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness. Lydia E. Pinkham's Vegetable Compound Co., Lynn, Mass.

W. L. DOUGLAS SHOES

W. L. Douglas makes and sells more men's \$3.50 shoes than any other manufacturer in the world. He makes shoes that are comfortable, durable, and stylish. He makes shoes that are comfortable, durable, and stylish. He makes shoes that are comfortable, durable, and stylish.

WE WANT YOUR NAME and will send you prospectus
