During the winter months the head members as to prospects for the future, and doubtless one of the most interesting topics discussed is that of moving to some better country.

Having before me the knowledge where he can secure a home with the expenditure of a little money, it will for him to obtain all information possible regarding the productiveness of the land in the country that he may select.

Western Canada is the last unoccupied and unimproved good agricultural land in America available today.

He then discusses its possibilities for raising livestock and all the advantages it possesses for dairying, farming and wheat growing, and says: What has been said about the country is the ability of the soil, the yield of wonderful crops of wheat, is quite justified.

To quote further from Mr. Heath, he says referring to climate: "These people (skeptical ones) do not know or realize that although more than half the year is winter, that large bodies of water, both fresh and salt, that never freeze over, exert a wonderful influence on climate."

Another influence on climate, more potent than those named above, which applies more to the Alberta district, is the warm Chukoo current from the Pacific ocean which is 600 to 700 miles nearer than Colorado or Wyoming, besides the Rocky Mountain range is not a high range, being only so far from the ocean as it is down in the States.

"In further considering the climate of the Canadian prairie we should not lose sight of the fact of the influence of the rains; the total average rainfall for the season is 22 inches for the territories, and 17 1/2 inches in Manitoba, and that the amounts falling between April and October is 14 and respectively 2 1/2 inches and 12 1/2 inches or about three-fourths of the entire rainfall.

"We do not wish it understood that the Canadian prairie is a desert country; it leads in that, yet it is destined to become famous for its cattle, horses and sheep and for its dairy products."

"The government of the Dominion of Canada is still using the same energetic efforts which have been used for years to attract to this western prairie, and on application to any Agent of the Canadian government the settler will be able to secure a certificate entitling him to a rate of interest which will give him the opportunity of visiting any portion of Canada gratis producing domain."

Byron Supersuperstitions. Friday was always a black day in the Dominion of Canada. It is a fact, in one's mind, dreams, supernatural appearances, apparitions, presentiments and all such. He remembered before the first of the Dominion of Canada, proof that even the strongest intellects have always their weak side.

Egg an Easter Symbol of the World Over. Easter day is the first Sunday after the first full moon that occurs after the 21st of March, the time of the vernal equinox, called the paschal full moon.

On the night when the Savior was laid in the sepulchre a nesting bird was brooding over her unhatched eggs, the branches of a nearby tree. Smitten with sorrow, the bird wailed sad dirges day and night, until the young of the bird broke out into jubilation from the mouth of the sepulchre. Thus as Christ, triumphing over death, came forth, the bird, rejoicing at the first glaze of Easter, broke out into jubilation from the mouth of the sepulchre.
