Reports from supervisors which have been filed in the county clerk's office show that in 1903 there were 129 more births than deaths in the county. In the year 618 births were reported in the county and of this number more than half were male children. The reports show a

falling off in the number of children to American parents, while the number of foreign parents is steadily increasing. This is especially true in the southern portion of the county which borders on Wayne county, where there are many German and Polish farmers.

Wheat which has been threshed in the northwestern part of the county with few exceptions, is turning out at an average of eight to ten bushels of poor quality per acre. In many instances the yield will go below even this; in others the crop will be good only for chicken feed, and in other cases will not be cut at all. The good yields of good wheat are decidedly scarce and if a farmer gets his seed back he is playing in good luck; and if he has anything left for his own time after paying the threshing bill he will be more lucky.

Now that the roads are good and the hurry season of haying and harvest are about over, it's a pretty good time for farmers to lay in a stock of drain tile. The Birmingham Brick & Tile Co. Ever stop to consider that your tile is the smallest part of the expense of your drain? Then the best tile is surely the cheapest. Every piece of ware is fully guaranteed.
