We easy that a man becomes of age on his twenty-first birthday, but it is just as well to be right about these things, and, as a matter of fact, a man becomes of age on his twelve, but cleven years old on his twelfth birthday is the day he is born; his second birthday is the day he is born; his second birthday is the day he is born; his second birthday is the day he is born; his second birthday is the day he is born; his second birthday is the cleven years old, the age keeping one year behind the number of the birthday.

It would be different if we used the word "anniversary" instead of
