## DISASTERS OF 1904

### War in the East Has Occupied the Center of the World's Stage During the Twelve Months Just Ended—Progress of Arbitration—Commercial Progress of the United States a Gratifying Feature—Railroad Disasters Serious—Enormous Increase in Farm Wealth—Notable Names in the List of Those Fumbers With the Dead.

War occupied the center of the world's stage in 1904. The long-threatened conflict between Russia and Japan, which broke out in the far east, broke out early in the year. It was a war of a different character from the twelve-month conflict. Diplomatic relations were severed on Aug. 2 and two days later the Japanese attacked and quickly disabled the Russian warships at Port Arthur. The Japanese then proceeded to capture the Russian warships at Chemulpo, Korea, land-locked troops and began the capture of Manchuria. The Japanese then proceeded to capture the Russian warships at Chemulpo, Korea, land-locked troops and began the capture of Manchuria. **Why, Can She?** It is very difficult for a man to believe that a girl with golden hair and blue eyes would ever tell a fib—Baltimore American.

**A Guaranteed Cure For Piles.** Loring-Bland, Binding or Prolapsing Piles. This is a cure for piles in 14 days.

**"A Wise Woman."** Many women wear thin linen underclothing in winter and then they logically complain of red noses, enlarged veins in the face, rough, red hands and a dry, ill-nourished skin. Now the way to maintain a soft, supple skin and a clear and pink complexion is to keep up a plentiful supply of blood near the surface all over the body. A wise woman knows that nothing is more essential to a lovely skin than cold feet. Therefore, even if she indulges in the vanity of open silk or perforated hose, she uses a cork sole in her shoes to keep up the circulation of the blood, upon which the skin depends so largely for its softness and luster. Lack of strength in the abdomen leads to a congested state of the liver and the huge network of blood vessels which control the supply of nourishment to the skin are situated in the abdomen. The middle of the body should be kept warm and free from the chills which cause contraction of the blood vessels. Chicago News.

**Children's Working Hours.** Important physiological experiments have been made in Russia to test the endurance of school children. The results prove that in the lower four classes study may be continued for a period not exceeding twenty-two or twenty-seven hours per week, but that excessive fatigue results from longer continuance of school work. This time for teaching these classes has been fixed by the latest order of the ministry of public instruction. It is urged, however, that this should be the outside limit, and that no lessons should be studied at home.

**Makes Him Tired.** "A man who tells me how his wife and I are getting on," said the customer had departed. "I want a man to tell me how he wants his hair cut, and his impression on the subject of views." "It can't be helped," replied his companion. "Once when I went to a house to cut a man's hair he told his wife in the room to tell me how to do it."

**Baby's Urgent Need.** Edgar, aged 5, was taken in to see his new baby brother. After walking around him several times and viewing him critically, he said to his mother, "Mamma, don't you think we had better get a wig for that kid like grandpa's?"

**MIGHT HAVE SAVED IT.** A lot of trouble from 'oo Much Starchy Food.

A little boy of eight years whose parents did not feed him on the right kind of food was always nervous and sick. He had a very bad cold, a very bad stomach and bowels. Finally he was taken down with appendicitis and died. The operation, however, knowing that his intestinal digestion was very weak, put him on Grape-Nuts twice a day.

He rapidly recovered and about two months thereafter, his father states, "He has grown to be strong, muscular, and his whole system is in a fine condition of health." Named given by Postum Co., Battle Creek, Mich.

It is plain that if he had been put on Grape-Nuts at an earlier age, his food is caused by indigestion, that disease is caused by indigestion, that disease is caused by indigestion, that disease is caused by indigestion.

**Abolition Makes Progress.** War was waged throughout the year the cause of peace was advanced by the adoption of the preliminary arbitration treaties. The treaty between Great Britain and France, signed Oct. 18, 1903. All the other arbitration treaties have been signed.
