TRUSSES

THE RIGHT KIND TO BUY. you can buy Trusses for almost nothing, or you can pay a very high price for them; but the price of a Truss does not prove that it is going to be the Truss which you need. Every case has to be fitted individually. That is where we have our great success with Trusses. No one goes out of our store with a Truss that does not fit perfectly. Therefore a great many people are wearing our Trusses and sending their friends to us for Trusses. If you are wearing a Truss and it does not fit right or stay in the right place come in and see us about it. We will tell you whether it is the right Truss for you to wear.

Chestnuts a Good Food. The chestnut contains less water, more starch, more fat, but less mineral water than the potato. The chestnut is, in fact, more nutritious than the potato, says the most digestible of nuts, because it contains different constituents, but contains a weight for weight it contains a greater proportion of them. The chestnut in fact is made up in the potato by a part of butter; in the chestnut there is already an important proportion of fat. The chestnut, however, is the most digestible of nuts, because it does not contain an excess of fat.

Notwithstanding the honor which harakiri is held in Japan, the proportion of suicides there is comparatively low—177 a million, to 246 in France, 228 in Denmark, 150 in Switzerland and 206 in Germany. Cobbett a Model of Style. A London reviewer says that he once asked a famous editor who he would be proud to propose as a model of style for a journalist. Without a moment's hesitation, the great man answered, "Cobbett."

Collapsible Theater Hat. A collapsible theater hat, that may be folded into a minute space, and when necessary will resume its former symmetry, has been invented by a London milliner for the benefit of her sex. The hat, which has been patented, is made on an ingenious framework, which can be covered with pliable straw, chiffon, lace or cloth—indeed, any material save velvet, which would crush too much to be used at Massachussetts pond. It is understood that the killing of fish resulted from experiments made under the direction of the Massachusetts state board of health to determine the efficacy of copper sulphate in exterminating algae.
