Her remarkable woman, whose maiden name was Estes, was born in Lynn, Mass., February 23, 1819. For many years she taught school, and during her career as a teacher she became known as a woman of an alert and investigating mind.

In those good old-fashioned days few drugs were used in medicine, people relied upon nature's remedies, roots and herbs, which are today recognized as more potent and efficacious in controlling diseases than any combination of drugs.

Knowing of so much suffering among her sex, after much study and research, Mrs. Pinkham believed that the diseases of women have a common cause, and she set to work to find a common remedy.
