Cawdor Castle still mocks the Tooth of Devoouring Time. Hamlet's castle at Blinworth, which still remains precisely as in his day is not the only habit which still mocks the tooth of cormorant devouring time.

During his many centuries of life, Cawdor castle has accumulated many who were led to graves from its towers, and so the great hall, where the deed of dreadful note was first re- solved may not be at present located.

That not many artists have cared for such a night's lodging on any other place is due to the fact that the fact that only four pictures are of that chamber's walls. Lady Macbeth in her raving state, the owl, the fatal dagger drawn, the bridge cut that mowed three, and the owl, the fatal helmet as well as the three other pictures and midnight haags over the cauldron!

The average eastern tourist who visits California enters the state at Los Angeles, takes a few rides on the various railroads, and then returns to the train for San Francisco, visits the seals, and hastens north or east affirming that he has "seen California."

OR FIGHTING for a COLONY BY CHARLES MORRIS BUTLER

Author of "The Romance of Power," "A Romantic Tragedy," "Hells, Etc." Copyright, 1916, by Morris C. Butler.

CHAPTER I. Jim Denver, the Detective, and His Great Scheme. "I believe this is Louis Lang?" "It is."

"Well, how are you today?" "Oh, fairly well," replied the young man addressed as Lang. He was sitting before a small table in one of the secluded corners of a high-class saloon on Clark street, Chicago.

It was a cruel stab, and Lang was flustered for a moment, an angry flush spreading over his face. A shudder ran down his spine. "Whom have I the honor of addressing?"

"I have no love for you, certainly—and as far as that goes, no grudge against you," answered Lang. "The arrest was a mistake. You can bet that you will have no further cause to 'take me!' The subject was very painful to Lang. He fledged around in his chair as if sitting on a red-hot gridiron.

"Keep on in the way you are going," said the detective, "and you will find a colony of thieves of over a million dollars in gold."

"Not much," answered Lang. "What would make life of interest to you?" asked the detective, as if interested in the answer.

"Not much," answered Lang. "What would make life of interest to you?" asked the detective, as if interested in the answer.

one has hinted at the possibility of the existence of such a place, and it would be no less reasonable. How else can we account for the many complete disappearances of men as Shell's murderer (with \$50,000 on his life) and the missing of Amelia Olsen? I would not be surprised if it could be proven that they were all secure from the law they have outraged. But how, my dearer, thieves—these are the colonists who select gathering."

"And you imagine, because these gangsters cannot be traced to Canada or Mexico, that they have formed a colony in some secluded part of the United States. Barring the lions of the law in their den, as it were."

"That's my idea exactly. And the thing is, however, to my thinking," claimed Denver, "is the fact that these colonists must have a world of gold money in their possession!"

"Where did you get your idea?" "From a dying criminal, who confessed to having a knowledge of such a place, though he could not tell me where it was located. It was described as a barricaded town. For a certain sum of money prisoners or accused persons were allowed to escape from custody, and taken to this place to live. The sum demanded as an admission fee is so large that none but the criminals of renown and wealth become 'colonists,' and as they are hardly able to use for money in a place unobscuredly supported by co-operative conditions of tenor and inflammation. "These 'colonists' must have a powerful clique on the outside—agents in every city of importance in the United States," said Lang, "to recruit the colony in the way described by you." (To be continued.)

SOME IDEAS ABOUT WOMEN.

By One Who Imagines He Knows the Softer Sex.

The woman who knows Greek will still spend an hour and a half in dressing her hair for a party. I caught a woman who wore the 'hair' short a million unemployed hours would be thrown daily upon the world.

OTHERHOOD

Actual Sterility in Women is Very Rare—Healthy Mothers and Children Make Happy Homes.

Many women long for a child to bless their homes, but because of some debility or displacement of the female organs they are barren.

Preparation for healthy maternity is accomplished by Lydia E. Pinkham's Vegetable Compound more successfully than by any other medicine, because it gives tone and strength to the entire female organism, curing all displacements, ulceration and inflammation.

Mrs. M. P. Wharry, Secretary of the North Shore Obstetrical Society, The Norman, Milwaukee, Wis., writes: "I was married for five years and gave birth to two premature children. Lydia E. Pinkham's Vegetable Compound was recommended to me, and so glad I took it, I changed me from a weak, nervous woman to a strong, happy and healthy one within seven months. Within two years a lovely little girl was born, which the pediatrician said was a miracle. The light, health and happiness it brought to my home."

Truths that Strike Home

Your grocer is honest and—if he cares to do so—can tell you that he knows very little about the bulk coffee he sells you. How can he know, where it originally came from, how it was handled—of with what water—or when roasted? If you buy your coffee loose by the pound, how can you expect purity and uniform quality?

LION COFFEE, THE LEADER OF ALL PACKAGE COFFEES, is of necessity uniform in quality, strength and flavor. For OVER A QUARTER OF A CENTURY, LION COFFEE has been the standard coffee in millions of homes.

LION COFFEE is carefully packed in our factories, and cannot be opened in your home, but because of being so treated, or of coming in contact with dust, dirt, germs, or unclean hands.

In each package of LION COFFEE you get one full pound of Pure Coffee. Insist upon getting the genuine. (Lion head on every package.) (Save the Lion-heads for valuable premiums.)
