TRUSSES THE RIGHT KIND TO BUY.

you can buy Trusses for almost nothing or you can pay a very high price for them; but the price of a Truss does not prove that it is going to be the Truss which you need. Every case has to be fitted individually. That is where we have our big success with Trusses. No one goes out of our store with a Truss that does not fit perfectly. Therefore a great many people are wearing our Trusses and sending their friends to us for Trusses. If you are wearing a Truss and it does not feel right or stay in the right place come in and see us about it. We will tell you whether it is the right Truss for you to wear. E. L. REYSER, PORTLAND, ME.

HEARING CLAIMS BEFORE COURT STATE OF MICHIGAN. Notice is hereby given that by an order of the Probate Court for the county of Oakland, made on the 28th day of April, A. D. 1904, the following claims were presented to said court.

FINAL SETTLEMENT. STATE OF MICHIGAN. In an action of the Probate Court for the county of Oakland, in the City of Pontiac, Michigan, on the 28th day of April, in the year of our Lord one thousand nine hundred and four, Present, JOSEPH R. STOCKWELL, Judge of said court.

DRIFTING TOWARDS BRIGHT'S DISEASE. Many people who are neglecting symptoms of kidney trouble, hoping "it will wear away," are drifting towards Bright's Disease, which is kidney trouble in one of its worst forms. FOLEY'S KIDNEY CURE stops irregularities, strengthens the urinary organs and builds up the worn-out tissues of the kidneys so they will perform their functions properly.

Randall's complete outfit for driving wells I am pleased to offer my services to the farmers of the county to secure water for them, and will drill by the foot or by the day, and guarantee satisfaction either way. I have also for sale Windmills, Gasoline Engines and Pumps, at prices as low as anyone, and I will set them up and see that they are running O. K. before leaving. I can be found at National Hotel Saturday nights and Sundays.

Lyman Hood PROBATE OF WILL. STATE OF MICHIGAN. THE PROBATE COURT FOR THE COUNTY OF OAKLAND. At a session of said court, held at the Probate Office in the City of Pontiac, on the 28th day of May, A. D. 1904.

Roger's Stain Floor Finish For Floors it is the best and most durable finish ever manufactured for use on either hard or soft wood floors. Stains and Varnishes by one application, and is the most durable Floor Finish on the market; also the best possible Floor Finish for all kinds of Interior Woodwork, where extreme durability is required. Hardy Flowering Plants. Perpetual snow is the only limit to flowering plants. In Tibet these have been found growing freely at heights of from 15,000 to 18,000 feet.

Tiling Hills. It is a mistake to suppose that hills never need to be tilled. Where the soil is sandy it is of course not necessary to go to the expense of tiling them, that is, provided the upper soil and the subsoil are both of a porous nature. We have seen sandy lands that needed tiling, but they are not common. The writer has in mind a field where the lime in the soil seems to have worked down into the subsoil and formed an impervious layer about as hard as cement, through which the water could pass at any time of year. In another field of this nature the drains had to be blasted through a conglomerate formation of rotten rock.

Postal Millet. Under the name of Japanese millet several kinds of foxtail millets are being grown in this country. Most of these millets are large in form and yield heavily in seed and forage, under favorable conditions, but do not several kinds of Japanese millet.

To Escape Insects. On a farm of good size the best way to keep the destructive insects down is to rotate crops. I find that in that way I can generally escape the worst of the insect pests. Where the same crop is planted on the same field year after year the insects have a chance to establish themselves in colonies. In the case of the plant lice on corn roots there is little danger the first year because the ants are the real chief-makers. If the field has been in oats the previous year we may expect to find no ants there, for the lice do not feed on the roots of the oat plant. Not till corn has been on the same land for several years will the ant invasion become serious, and without the ant invasion we have nothing to fear from the plant lice.

Latent Fertility. An average of the results of 49 analyses of the typical soils of the United States showed per acre for the first eight inches of surface 2,500 pounds of nitrogen, 4,900 pounds of phosphoric acid and 13,400 pounds of potash. The average yield of wheat in the United States is 14 bushels per acre. Such a crop will contain 23.7 pounds of nitrogen, 9.5 pounds of phosphoric acid and 13.7 pounds of potash. Now if all of the potential nitrogen, phosphoric acid and potash could be rendered available there is present in such an average soil, in the first eight inches, enough nitrogen to last 2.7 times as much phosphoric acid for 500 and enough potash for 1,000 years.
