

A Convincing Critic

There was a time I do confess,
I occupied Number 371 as a contented
drum to the neighborhood.

truth be told, Tony found a shelter.

How it came to pass that Old Tony

SAYS TYPHOID PATIENT.
Young Lady Left by Fever in Very Weak
State. Dr. Williams' Pink Pills
with Gratifying Results.

After a fever, such as typhoid or scar-
let fever, the body remains in a
debilitated condition. The recovery
of the system is slow. The blood
will most rapidly increase the red
corpuscles in the blood is the one that
will give the body new strength.

Miss Midford had been ill with
typhoid fever for four or five weeks.
She had a good physician who carried
her safely through the critical stages.
When she felt, nothing remained to be done
except to build up her strength, which
was very feeble, and he gave her some
prescriptions for that purpose. Here,
however, she met with disappointment.

Dr. Williams' Pink Pills for
Pale People.
"for two months after I had recovered
from the fever, but they did not do
me the good I had hoped for. My strength
came back so slowly that I scarcely seemed
to be making any progress at all. Just
then I read in a book through in our
yard some striking testimonies showing
what wonderful blood-builders and
strength-givers Dr. Williams' Pink Pills
are. I got a box of them soon after
this and after I had taken only about
half of them I could see a very great
improvement in my condition. When I
finished the box, I felt that I did
not need any more medicine. My
strength returned, and I have
remained strong ever since."

Miss E. B. Midford lives at No.
