islea: There's not the smalleud orb the thou behold's that in his mo, in like an angel sings," he spoke utifully, but in metaphor. Music the most artificial of the arts, and the most artificial of the arts, and aning are fleentifical. It has also in generally accepted any the most of the arts, and the most in generally accepted any the most in the second and but her all "Next to theology, I give to sic the highest place and honor; I we see how David and all the nats have wrought their godly ughts into verse, rhyme and song;", seems rather strange, therefore, a Collier's, that this-art, being the at ethereal, should be the one of the promises to be emost mechan-tly produced. Its progress has a dependent upon mechanical la-tion, until the orchestra, reached to make the second of the promises and now every effort inventive science is turned on the invalide of the human player. hether, or not this effort shall suc-ede entirely in giving the very best, is certain to result in giving music considerable quality a larger place that lives of millions, and there-re it ought to be one of the most iritually valuable directions of mod-
