WOMEN'S FASHION. One of Rejane's coats is made of silver lace and is covered with gold...

Pay Attention to Hands.

CARE AND MANICURING ESSENTIAL TO BEAUTY. Possession of a Simple Outfit and a Little Time Will be Necessary to the Possession of a Pair of Dainty Fingers.

There can be no doubt that very few women devote the attention to the hands that is really demanded. Often the woman who is content to spend many a half hour on the study and beautifying of her face...

Those who do not mind going to a little trouble will find that manicuring can easily be accomplished by themselves. The number of accessories is limited and the cost is not cost much.

Before you start the actual manicuring, you must wash your hand very thoroughly in warm water. Then dry it carefully, and soon the fingers, say for this or two minutes, in a bowl of hot, soapy water...

Now go round the nail underneath with the brush and be sure that you ever you do not go too deep. If you do, the shape of the nail will be at once spoiled.

Now comes the important process of filing, and here let it be said that the nails should always be filed, and not cut. Before starting, put some vasoline on the nail, and then filing it to work in and wipe off.

Work with the idea of giving the nail a good shape. This means that on completely dry nail should have a narrow line of vasoline drawn over at the point. As a rule, if the nails are filed about every three days, it will be quite sufficient.

Afterward soak the fingers in very hot water, in order that the vasoline may soak in thoroughly. Then polish with the powder or rubber or leather.

Once again, wash the hands in warm water, and then apply the vasoline. After which they may be again be briskly rubbed with a towel or leather, but without powder.

Many women are troubled at times by their nails cracking, and in this case it is a good plan to apply to them an ointment which has the effect of hardening them. The following is excellent for this purpose:

Entire street suits of the dressy order will be made of checked velvet, tulle, harmonious colorings, of course.

THE LOST LEGION

Chief Crozier of the New York fire brigade, offers the following advice as to conduct in case of an outbreak fire.

"Send in the alarm immediately; do not take it for granted that some one else has rung up the fire department."

"Fight the fire yourself before the firemen arrive. Very few fires, if discovered at the outset are beyond the control of the people on the premises."

"Never ascend to the upper stories of a burning building. The upper floors are always the most dangerous. The smoke, superheated air and poisonous fumes are deadly."

"Make your way from the building if you are in a dangerous position and you can escape without having to pass through a fire."

Until the last century, in variety and magnificence, the human male followed the rule of the lower animals.
