

COULD NOT KEEP UP.

Broken Down, Like Many Another Woman, with Exhausting Kidney Trouble.

Mrs. A. Taylor, of Wharton, N. J., says: "I had kidney trouble in its most painful and severe form, and the tortures I went through were almost unbearable. I had backache, pain in the legs and loins, dizzy spells and hot, feverish headaches. There were no secretions, I passed water frequently, and with a burning sensation. They shot me up, and I became discouraged, weak, languid and depressed, so sick and weak that I could not keep up. A doctor did not cure me. I decided to try Doan's Kidney Pills, and with such success that my troubles were all gone after using a few boxes, and my strength, ambition and general health is fine."

Sold by all dealers. 50 cents a box. Foster-McLure Co., Buffalo, N. Y.

Another Dig at Powers. A few days ago Gov. Cobb, of Maine, and Hon. W. R. Pattangall, prominent in politics in the same state, were together on a train. Mr. Pattangall is a lawyer and an editor, the writer of the humorous "Meddymops Letters" appearing in his paper, the Machinist Union. In the course of conversation, Gov. Cobb remarked to Mr. Pattangall: "I don't see why you and Lively Powers should be so extremely antagonistic to each other. Neither of you ever fails to give the other a rap when there is opportunity. At this point an interested listener in the car leaned toward their chairs and asked: "Is it really true that Ex-Gov. Powers is an Indian descendant?" "Well, the Indians deny it," Mr. Pattangall answered, in his inimitable manner.

Missionary Work in Africa. All missionary societies at work in Africa have now in hand numbers 1,000 principal mission stations, with about 5,000 sub-stations.

Inventor's Fondness for Music. Thomas A. Edison, the noted electrician and inventor, is extremely fond of music.

Two Bachelors and a Widow

By J. J. BELL (Author of "Was MacGregor.")

"Hail the widow came they were separated only by an empty house of five rooms and kitchen. Mr. Thomas Haddock, of No. 7, and Mr. George Mulberry, of No. 9, Wellington Terrace, were regarded by the neighborhood as delightful exemplars of bachelor friendship.

Three a week Mr. Haddock dined at No. 9; three a week Mr. Mulberry dined at No. 7; once a week they met in an old-fashioned sitting house, and shared a pie specially prepared for them, and likewise two bottles of good red wine. Occasionally they were asked to dinner, but none of their friends would have dreamed of inviting the one without the other.

One morning in early spring, as Messrs. Haddock and Mulberry were starting off to business, they noticed at the same moment that the long familiar bill at No. 8 bearing the words "The Let" had disappeared. The widow was moving in.

Mr. Haddock was the first to make the widow's acquaintance. He had just finished his breakfast on a bright May morning when it occurred to him that he might enjoy his pipe none the less if he opened the French window and let the freshness of spring into his parlor.

He rose from the table and went to the window, whereupon he beheld a white cat strolling about his flower beds.

"I found the animal," he muttered, and flung open the glass door. "Peter, Peter, pretty Peter, come here, come here!" he heard a voice—sweet voice—calling.

"You didn't, you idiot!" retorted the other, in a passion. A savage jerk was followed at once by a burst of loud squalls. The two bachelors, half dazed with the floodlight, stood panting and pale in the sight of Mrs. Neville, her mother, and her two nephews.

"Oh, my Peter, my pretty Peter!" began the widow, but suddenly choked and went off in soft sobs of merriment.

PUTNAM FADELESS DYES color your brighter, clearer, with less time than others.

Striking Advice. Mrs. Anxious (mother of two marriageable daughters)—Really, I don't know how you men Grand and Esau get to the seashore or the mountains this summer. What do you advise?

Mr. Knowledgeful (who is an advice columnist)—Putnam's Fadeless Dyes, you know, is one of the principal requisites in matchmaking.

Superb Service, Splendid Scenery in route to Niagara Falls, Muskoka and Kawartha Lakes, Georgian Bay, the Thousand Islands, the St. Lawrence River and Rapids, Thousand Islands, Algonquin National Park, White Mountains and Atlantic Sea Coast Resorts.

Transmission of Facial Characteristics. It would appear that the transmission of facial characteristics is a definite law, that is to say, that ancestral facial expression and appearance are more often not transmitted through the female members of the family, who generally do not exhibit the same characteristics to the male offspring, and that the same law governs the transmission of all the facial conditions and signs which were present in a remote ancestor.—North American Review.

DOCTOR CURED OF ECZEMA. Maryland Physician Cures Himself—Dr. Fisher Says: "Cuticura Remedies Possess True Merit."

"My face was afflicted with eczema in the year 1897. I used the Cuticura Remedies, and was entirely cured. I am now a practicing physician, and very often prescribe Cuticura Resolvent and Cuticura Soap in cases of eczema, and they have cured where other forms have failed. I have a long habit of endorsing patent medicines, but when I find remedies possessing true merit, such as the Cuticura Remedies, I do not hesitate to recommend them to proclaim their virtues to the world. I have been practicing medicine for sixteen years, and must say I find your Remedies a No. 1. I have written to publish this letter. G. M. Fisher, M. D., Big Pool, Md., May 24, 1906."

Butler's Stolen Feet. The late Hon. Joseph Q. Hoyt, former of Boston, who had attended a circus and his silver watch was stolen. The supposed thief was arrested, and was defended by Benjamin Butler, who had a watch and did not take the watch, and never was at the circus.

During the time Mr. Hoyt was in prison, Butler attended to him at Astor house, in New York, and the latter remarked: "This is the first time I have had the pleasure of meeting you."

"Oh, no," said Hoyt, who then related the circus incident. "Was it you, Hoyt?" asked Butler, and being answered in the affirmative, Butler laughed and said: "That was an awful good watch, but that is all I got for defending the thief."

BOYISH MIND WAS WORKING. Youngster on His First Sail Over the "Raging Main."

None of us ever quite forget those days—when our years were few—of dreaming about life on the raging main. I had a very boyish mind when I was in pirates and plunder from state galleons and valorous deeds done on storm-swept decks, says a writer to the New York Times. Recollection of this period is, at any rate, sufficiently vivid, so that the remark of a small boy could contribute mainly to the rays of a star among the passengers on one of the excursion steamers running from Manhattan across the harbor to Connetquot Island.

"The steamer made her way across the bay, dodging tugs and ferries, but fortunately meeting no pirate craft. The passengers, equipped gladly from the city's heat, abiding their sand wiches and enjoyed the breeze. The water was most beautiful, and with their trays. The boy, just from the inland town, where his life so far had been spent, sat rapt and wide awake. If one could but know fully the "mental content" from which sprang his words at last!

"Which one?" he asked hoarsely, "tell me which one of 'em is the skipper!"

SALLOW FACES Often Caused by Coffee Drinking. How many persons realize that coffee does so disturb digestion that it produces a muddy, yellow complexion? A ten days' trial of Postum Coffee has proven a means, in those cases of clearing up bac complications.

Heritt—I had a party give in my honor the other night. Miss Wade—Why, I hadn't heard of any party party coming off.

GOOD COLORS FOR HOUSES. It is not generally known—nor even among painters—by certain tints and colors wear much better than others on houses, and the knowledge of this fact has led to the use of, therefore, rather rare.

One writer on paint, in a recent book, says that experiments seem to show that these colors which resist or turn back the heat rays of the sun, will protect a house better than any other. I allow these rays to pass through the paint.

This red is a good color because it is a warm color, and reflects the red rays, and the red rays are the heat rays. In general, therefore, the warm tones are good and the cold tones are poor, so far as wear is concerned. In choosing the color of paint for your house, select red, brown, gray, and olives which, considering the value of these tints will produce, will give a wide range from which to choose.

Avoid the harsh tints, such as cold yellow, blue, green, etc., and the blue (like grass green, etc.), cold greens. It must be understood that no violet is claimed for tints in themselves. In choosing the materials used in the paint, any color will fade, and the paint will scale off, if adulterated with lead or canned paint is used, but if one is careful to use the best white lead—some well-known brand of a reliable manufacturer—and good quality of oil, the warm tints mentioned above will outwear the same materials tinted with the cold colors.

Suffered for "White Lie." That at least some people believe it has no excuse is proved by the following tale. An ancient rabbi came to a city where all the people were truthful, married one of the inhabitants, had two children and prospered. One day a neighbor called when the rabbi's wife was washing her baby, and the wife, by false modesty and said that she had gone out with her two children, and no one died in that city before reaching old age, the neighbors made inquiries, the rabbi confessed what he had done, and was ordered to leave the city immediately.

Chinese Ingenuity. Many articles have been made to end an unflattering supply of pearls. The Chinese, it is said, have solved in their own way the problem of how to produce a number of pearls. They use six small beads, made of mother-pearl and strung together by a thread, are dropped at the proper season into the open mouth of the shell. Two years later the mussel, when recovered, is made to disclose the beads, which are then removed, and are indistinguishable from the naturally made pearl.

Mr. Alexander Connell, who succeeds to his father's pulpit at St. John's Church, London, says 1893. He was in the Scotch Highlands just 40 years ago.

In a Pinch, Use ALLEN'S FOOT-EASE. A powder. It cures painful, smarting, nervous feet and ingrowing nails. It is the greatest comfort discovery of the age. Makes new shoes easy. A certain cure for sweating feet. 30,000 testimonials of cures. Sold by druggists, 25c. Trial package, FREE. Address A. S. Olmsted, Le Roy, N. Y.

Origin of Knighthood. Knighthood was intended to serve as a mark of distinction for deeds of valor and merit. "Knight" properly signifies a person, who, for his virtue and martial prowess, is raised from the rank of gentleman into a higher class of dignity and honor.

Mr. Wiggin's Soothing Syrup. For children teething, soothes the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

A man never realizes the goodness of his neighbors until he is a fly.

New Emperor William is Battling Against a Dangerous Heredity.

Emperor William's father died of cancer of the throat. Emperor William himself had insupportable pain, and has had to struggle with many intimations.

It is whispered that he himself is troubled with the same disease which carried off his father. Royal blood is unduly sensitive to the influence of a deteriorated blood. Emperor William knows this as well as any man, and he is endeavoring to eradicate the bad blood from himself and his family by the adoption of simple hygienic principles.

Through the visit of a countryman of his to the Battle Creek Sanitarium, while in Europe in 1890, Emperor William became acquainted with the Battle Creek idea of eradicating the methods in his family. His wife and children live the simple life and take Battle Creek baths. Their uncle, King Edward, also has these baths installed at his Windsor and Buckingham Palaces for the use of himself and Queen Alexandra.

Among other things GOOD HEALTH, the oldest health journal in the world, tells about the Battle Creek idea and the simple life. Every number is brimful of up-to-date information. Sample copy 10 cents. One dollar a year.

Career of Veteran Engineer. Charles Haynes Haswell, 97 years old, is a practical engineer in New York city, and was an interesting figure at the laying of the New Engineers' clubhouse corner stone by Mrs. Carnegie the other day. He saw Robert Fulton's first steamboat on the Hudson river, and expects to take a prominent part in the Fulton and Clermont centennial next year. In the civil war he was chief of the engineer corps in Gen. Burnside's expedition and received high praise for his work.

After a man has tackled three or four enterprises and failed to succeed in a practical next year. In the civil war he was chief of the engineer corps in Gen. Burnside's expedition and received high praise for his work.

True friends seldom come in bunches. DO YOU WANT A JOB? A man who has been in the employ of the people for a long time will be well known to the public. He is a man who has been in the employ of the people for a long time and is well known to the public.

60 Bus. Winter Wheat Per Acre. The yield of wheat per acre in the State of Michigan is 60 bushels per acre. This is a record for the State of Michigan.

Thompson's Eye Water. It cures all eye troubles. It is a simple and effective remedy for all eye troubles.
