FARMERS BUYING AUTOS.

NEW SIGNS OF PROSPERITY OBSERVED IN THE WEST.

Manufacturers of Motor Cars Cannot Make Machines Fast Enough to Supply Demand from Tillers of the Soil.

Lincoln, Neb.—Western agents of automobile factories assert that if the machines could be obtained hundreds

As it is, the residents of the country towns and the farmers are buying more of the better bugs than the cities, and there is scarcely a country town in Nebraska in which there are not more automobiles in proportion to the population than in Lincoln or Omaha.

The prosperity of western farmers has become an old story, and this prosperity is going to be augmented this year by another big crop of wheat and corn and oats.

When a Nebraska agriculturalist buys his machinery collection he buys only that which will be of use.

The tractor is the favorite farm type automobile, largely because of its low first cost.

By using his work horses to go to town or about the country, he deducts just that much from their working capacity on the farm.
