

Nursing baby?
It's a heavy strain on mother.

Her system is called upon to supply nourishment for two.

Some form of nourishment that will be easily taken up by mother's system is needed.

Scott's Emulsion contains the greatest possible amount of nourishment in easily digested form.

Mother and baby are wonderfully helped by its use.

ALL DRUGGISTS, 50c. and \$1.00

Put Your Money In a New Country

The Pacific Coast extension of the Chicago, Milwaukee & St. Paul Railway now under construction, opens to the settler thousands of acres of excellent agricultural land. The new country in Adams, Hettlinger, and Bowman Counties, North Dakota, and Butte County, South Dakota, is now reached by the new track. The soil is a dark loam with clay subsoil, and produces in abundance wheat, oats, barley, speltz, flax, corn and potatoes. The land is well adapted to farming, good water is found at a depth of from twenty to fifty feet, and the whole country is underlain with lignite coal that outcrops along the streams, and in most cases can be had for the digging.

The climate is healthful, the air is dry and invigorating, and the percentage of sunshine days is high. Outdoor work can be done almost every day in the year. Rainfall is amply sufficient to raise the crops. Regular mail service has been established, the roads are good, rural telephone lines traverse the country, and automobiles are in common use. The deeded land in this district sells for from \$10 to \$18 per acre. There are many instances this year where the crop equalled in value the cost of the land.

In Butte County, South Dakota, there is considerable government land open for homestead entry. Government land offices are maintained at Lemmon, Hettlinger and Bowman, where filings and final papers may be made. All of these towns are on the new line of the

Foley's Kidney Cure

In Montana, the new railroad traverses good farming land. It has been demonstrated that big crops of grain may be raised. Along the Yellowstone and Musselshell rivers, the water is used for irrigation, and phenomenal yields of alfalfa, sugar beets, and grain are always certain. In the Judith Basin near Lewistown, Montana, is one of the most remarkable sections to be found on the new line. Under natural rainfall, the famous bench lands produced this year an average of 35 bushels of hard wheat to the acre, and the price was 94 cents per bushel. The basin contains about 1500 square miles and is sparsely settled. Some government land still remains open for settlement. A government land office is maintained at Lewistown. In Fergus County, outside the Judith Basin, is one of the greatest stock countries in the world, and good ranches can be purchased at a reasonable figure.

The Chicago, Milwaukee & St. Paul Railway Co. has established an immigration department for the purpose of assisting in the settlement and development of the new lands now being opened. Pamphlets descriptive of its resources will be forwarded free on request.
