TO BE A SEASON OF SERGE

Every Kind of This Material is in Favor, But the Wide Waists are Best Liked.

There will be a run upon serge this winter. It has always been a stock material. This year the weave is utterly unlike anything we have had.

SOUNDS LIKE A FAIRY TALE

THE FARMERS OF CENTRAL CANADA REAP WEALTH AND RICHES.

Up in the Provinces of Manitoba, Saskatchewan and Alberta, the provinces that compose Central Canada have such a quantity of land suitable for the growth of grain that they grow so abundantly, and yield so handsomely that no fear need be feared of a wheat famine on this Continent.

The country recently opened by the Grand Trunk Pacific, the latest of the great transcontinental lines to enter the field of the development of the Canadian West, offers the finest and ample opportunity to do as was done in the case cited below.

To buy a section of land, break it up and crop it, make \$17,500 out of the yield and \$10,880 out of the increase of value all within the short period of two years, was the record established by James Bailey, a well known farmer within a few miles of Regina.

Mr. Bailey bought the 640 acres of land near Grand Coulee two years ago. He immediately prepared the whole section for crop and this year has 6000 bushels of wheat and 40 acres of oats. The wheat yielded 19,875 bushels, and the oats yielded 4,750 bushels.

It is interesting to note the figures of the yield per acre. The wheat yielded 29 1/2 bushels to the acre, and the oats 118 1/2 bushels to the acre. The figures are a fair indication of the average throughout the district.

Recent figures from the Canadian Government in the different crops are as follows: to give you information as to rates, etc.

NOT HAVING ANY.

What sad memories linger around the old vacant chair. Sitting in the middle of the floor with a plaintive look about its frayed and seemingly weary back, it brings back a tumultuous riot of sad recollections that time can never efface.

There was an exclamation of horror. "What! he has always priding and self-satisfied with all their old-fashioned hospitality on their exclusiveness."

It is now claimed by a several western cities that a whiskey mixer is more desirable than any other beverage.

Not up to Modern Standards. "I don't let her hear you say that," answered Mr. Ketchum, who was sitting on the floor.

Rheumatism and Neuralgia never could get along with Hamam. Dr. Wizard Oil always drives them away from the premises.

Shadow Lace. This is new, and because of its an attractive pattern can be used in great quantities without fear of overcoloration.

Allen's Lung Balm. It is a valuable remedy for all kinds of lung troubles. It is a valuable remedy for all kinds of lung troubles.

Mrs. Wilton's Expectations

By JANE RICHARDSON

(Copyright, by Short Stories Co., Ltd.)

Mrs. Wilton sat in consultation with her three daughters the day after her husband's funeral. She had been a great beauty, and had been a large forid woman, with an abundance of blonde hair.

Her husband's sudden death had been an overwhelming blow to Mrs. Wilton. She was as helpless as a baby, and the two elder daughters scarcely less dependent; there was nothing by which either of the two might have helped her.

"There's your uncle Jabez, he'll be certain to help us. He never forgets us at Christmas, nor on any of your birthdays. Though he hadn't seen your father since he went out to California, he was very fond of him when they were boys, and he always meant to visit us."

"No, he won't forget us," Cecelia echoed, hopefully. "We can't depend upon that either," said the practical Susan, "he may not."

The eventful day came, dull and threatening, with a biting east wind. A fire crackled in the grate, casting a glow upon the wall and ceiling.

"Well, I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

"I'm glad to see you," said Mrs. Wilton, her eyes flashing. "I thought I should be glad to see you."

SAFETY FOR MINERS

SUFFERED TERRIBLY. How Relief from Distressing Kidney Trouble Was Found.

Recent Disaster at Cherry Hill Has Led Writer in Eastern Journal to Make Suggestions for Avoiding Catastrophes.

In reading the accounts of various recent coal mine disasters, it occurs to me that certain devices for protection of miners employed under such conditions which, from all accounts, appear not to have been utilized in such cases.

The temporary lighting of workings by electricity also affords greater safety, and would doubtless be very valuable in such accidents.

It would seem that devices like these, which may be used in some of the coal mines, should be installed in all coal mines where any considerable number of men are required to work.

THEIR WEDDING JOURNEY.

"Water, when are you going to bring the roast chicken?" "Why, you've already eaten your dinner, sir!" "But you've already said, sir!"

AGONIZING ITCHING.

Eczema for a Year—Got No Relief Even at Skin Hospital—In Despair.

Until Cuticura Cured Him.

"I was troubled with a severe itching and dry, scurfy skin on my ankles, feet, arms and chest. Scratching made it worse. Thousands of small red pimples formed and these caused intense itching. I was advised to go to the hospital for diseases of the skin. I did so, but the chief surgeon said: 'I never saw such a bad case of eczema.' But I got little or no relief. Then I tried many so-called remedies, but it became so bad that I almost gave up in despair. After suffering agonies for twelve months I was relieved of the almost unbearable itching after two or three applications of Cuticura Ointment. I continued its use, combined with Cuticura Sulfur Soap, and I was completely cured. Henry Seale, Little Rock, Ark., Oct. 8, 1907."

Duty Sickener Goes to Unfortunates.

Consumption is probably a poor man's disease. Dr. Woods Hutchinson, of New York city, says that speaking, the inefficient tuberculosis patient can buy as many chances of recovery as the rich man in a hospital. The percentage of deaths from consumption among the poor is 100 per cent. Higher than among the well-to-do, and cure as he is unable to pay for the best medical care.
