

Two Pretty Styles.

One phase of the modern age princess is demonstrated in our first illustration, the style being suited to either house or street wear. As illustrated, the dress is made of pale gray cloth, with a yoke of moire in the same tone, and a yoke of fancy net. The cuffs are also of the moire, but the buttons and piping used are of ivory velvet in a slightly deeper tone. For theater or other evening use this gown could be white, or cream, or pale blue, or dull rose cloth, or serge. The evening serges are very handsome, and within the means of most home sewers. For street wear, serge or cheviot would be good choices, and with these the yokes and cuffs could be of the same with a broad finish.

For a medium figure 5 1/2 yards of double width serge is enough for this gown.

The second model gives one of the evening dress aspects of the modern age. It is made of all-over and bordered fancy net. Any bordering sufficiently wide, however, to cut the top of the garment could be used for it, as well as a pretty figured silk, Swiss, or dotted or checked muslin, all of which materials the lace-entire dress and trims here employed go charmingly.

With a thin white material, such as net, lace or Swiss or barred muslin over a tinted silk and with ribbons in the same color, this gown would be charming for any of the holiday functions—so to some. If a low effect is desired, the line of the neck could be made round and the guimpe left off, in which case the line at the bottom of the bodice, and those of the sleeves, should be cut plain.

For the medium mature figure four yards of all-over net, and six yards of bordering would be required for this dress.

TURBANS GIVEN NEW NAMES

Milliners Work Hard Thinking Up Designations for That Form of Headgear.

Evidently the turban is to take on as many kinds and curls as the milliner can devise. And with each new kind comes a new name.

We have had Turkish, Uhan, Russian, Cosack, Sultan; now we are to have Rembrandt, Henry III., Hitler, De Stael, Drum Major and Napoleon.

Some of the furs of which they are made are of the ultra-fashionable ringlet, also ermine and seal skin. Australian opossum and mole skin. The drum major turban is trimmed with a circle of antique gold and bronze set with jewels.

OF CLOTH OF GOLD.

Our Underworked Acres.
The United States has the most fertile soil and most favorable climate in the world, but by careless methods produce an average of only one-fifth as much as the best fields of other countries. In the United States we have about 200,000,000 acres of land, of which only 100,000,000 are under cultivation. The average yield of wheat in the United States is only 15 bushels per acre, while in the best wheat fields of the world it is 40 bushels per acre.

PROPER LENGTH OF SKIRTS

Fashion's Decree Makes Distinct Variations in Dimensions of the Garment.

There is confusion in the minds of many concerning skirts. There is so much talk about smart gowns that five inches from the floor for evening and nearly six inches for morning, that women wonder if there is any hour in which the long, graceful skirt is worn.

The strict decree of fashion is this: Skirts five or six inches from the ground for street wear; that sweep the floor in a round train for the afternoon, and skirts five inches from the floor for the evening gown.

This is the decree! Everyone does not have to abide by it, but numbers of women will accept it in part, if not in whole. They may not wish to wear evening gown made short, or every afternoon frock made long, but they will assiduously have one of each kind to show that they know what is being done in the world of fashion.

BRONZE LINES

A beautiful but costly turban for evening wear of formal afternoon occasions is made from cloth of gold. It is artistically and beautifully draped and has for its sole decoration a gorgeous pattern of aigrette in natural coloring.

There are some women who are constantly utilizing old material, and then, again, others who discard a shirtwaist, skirt or dress merely because it is somewhat old style or torn in a few places.

Learn shapes are emphasized. In very good condition, save for a few holes at the neckband and waist line (caused by constant pinning), was saved from extinction by one of the captious, who converted it into stock collars and belts. The ends of the stocks were square, and on one collar five tiny flowers were embroidered.

There is a satisfaction in knowing that good material is never wasted. The half-worn linen skirt has countless possibilities.

BRONZE FISHNET

Brocade is much favored for bridesmaids' laces. Perhaps it solves the color problem as well, for it is always possible to secure festive occasions of blue or pink at the silk counter when the felt hats offer no assistance to eager buyers.

Lace shapes are popular, and plumes of the same color or contrasting tones are used. The design of the brocade seems especially ornamental and suitable for festive occasions.

After the great event these silk hats are lovely for evening wear.

BRONZE FISHNET

Black fishnet in coarse, heavy silk may deter women from wearing it. In connection with it, there has been invented an exceedingly pretty mesh of softest silk, which is caught around the crown, then over the back, and is brought around the right shoulder, encircles the neck and is caught at the side or the left front. It should be softened by the thick end of a plume. When a barbaric ornament is used in the center of it, the emphasis is bad. Yet nothing the critics will say will deter women from wearing it.

IRON IN TRADITION

FROM ITS DISCOVERY IT HAS BEEN A SYMBOL.

Instance in Point is Recorded in English History of the Year 1233 and Custom Still is Observed.

Henry III. in the year 1233, on the occasion of a tournament on ground belonging to the castle of Temple, near the site of what is now the Victoria Embankment, in London, England, was delighted with the dexterity shown by one Walter le Bryt, a knight of the realm, who had a novel on the ground, and was employed to show the knights' horses and repair their armor. In recognition of his skill he gave him a piece of land on which to erect a forge, and fixed the gift six horsebuses with nails complete, and these horsebuses and nails were duly counted out on Monday afternoon by the city scribe, as they had been counted out since the year when the gift was made.

In the other of the ceremonies which took place in the law courts on Monday, the rendering of the gift of the sharp and the iron, the noticeable point is that the knives, sharp or blunt, were of iron. Iron, with its wonderful powers of cutting, holding and striking, came from the day when it first began to be dimly understood as a new force in the world, at once a symbol and a sign of power. In iron, perhaps of iron, debts paid in iron, because significant and notable events. The tradition and the belief remain with us still, when we deal in iron with each other, we demand certain formalities to appease the latent powers in the obscure and potent metal. When we give presents of knives and pairs of scissors we ask in return, not even now shamelessly, but in a spirit of good-will, the point and the nail, and him for a halibutty back, "or else we shall quarrel." Knives, "ser vile," are still the most common and useful metal survivors in a dozen different ways in the ordinary life of the town and the country side of to-day. The story which will still be told of the most popular of all nursery fairytales is of the princess who must be guarded from childhood from the prick of a needle, and who is at last rescued from the Scottish household, when a death has occurred in the house, of thrusting a needle or a nail into butter or great or which will result in death from entering the provisions.

How Minnie Shadowed H. Sylvester Jones

By MARY E. HOLLAND

(Copyright, 1920, by Daily Free Pub. Co.)

A quiet, unobtrusive looking automobile drove up before a third-floor detective agency on a certain side street of downtown New York. A heavily gilded woman descended, spoke a few whispered words to the chauffeur, and one Walter le Bryt, a knight of the realm, whose glass plumes appeared the legend: "Sharp & Son, Private Detectives."

"Do you handle divorce cases?" she inquired, bluntly.

The brisk, nervous man before her swept his eyes over her quietly gowned figure.

"That depends upon the character of the case," he rejoined, cautiously.

The veiled woman took a quick step toward him. "I wish evidence that will procure me separation from my husband. Can you furnish it?"

The brisk man pondered. "Have you reason to believe that your husband is—er—unfaithful?"

"On the contrary, I have every reason to believe that he is not."

The brisk man pondered again. "You are setting us a difficult problem, my dear woman. Such cases, you must know, involve heavy expenditure. I may say a very heavy expenditure."

She smiled as he darted another shrewd glance toward the veiled client before him.

"Will you name an estimate of that expense?" she asked, quietly.

"Certainly; we could not conduct such a case under \$5,000."

The woman drew a roomy purse

from the close of the first act, he had made a hesitating remark, and she had answered it, and he had made another, and before the close of the act they were clasped in each other's arms. When the final curtain descended, they left the theater together.

An agent of "Sharp & Son," loitering in the corner, noticed what he writes, and reported it to his chief. The latter smiled broadly and the next morning eagerly awaited Minnie's arrival. Her maid came and she did not appear, he looked worried. When evening came without her, he sent for his agent and the two conferred to the next morning. It was a remarkable note, and under it was the scrawling signature of Minnie.

"I do not want your \$1,000, and I hereby resign my position."

The detective rose and called for his agent again. The latter looked at the note, and then at the girl who had been sent to trap him, and had tendered her not only his wealth, but his name. The fortunes of the detective, however, were never under a temporary cloud. H. Sylvester Jones bluntly told his wife that either he or she could go to South Dakota and return trip and a few weeks ago the decree of divorce was granted. Minnie, and everybody is satisfied, with the exception of "Sharp & Son." They have not yet received \$5,000 yet, and there doesn't seem to be any reasonable prospect of their ever being called to receipt the bill.

Furious Fun in English Society.
Now for the game the most popular at country houses this autumn. You may call it a variation on the old game of whist, or you may call it a new strip of paper and pencil. Each writes: "Why is it?" (choosing the name of a well-known person, a friend or acquaintance known to the general company), and then turns down his strip of paper and passes it to each guest who writes: "Because he or she." Thus: "Why is Winston Churchill like a piano organ?" "Because he flies from pillar to post."—The Gentlewoman.

First Cargo Arrives at Liverpool Where It Is Being Blended with Flour and Meal.

The first complete cargo of soy beans that arrived in the United Kingdom, says a consular report, reached Liverpool February 14, 1920, and the interest in this new industry has grown since then, experiments being made in various other parts of the country as well as in the city. The beans are being blended with flour and meal, to make a soy flour and meal.

Is Graduate of Vassar.
Baroness Uchida, wife of the newly appointed ambassador from Japan, is a graduate of Vassar, and is said to be one of the most accomplished women in her country. She took the highest honors in her class at Vassar, and then studied in Berlin and Paris. She is a member of the society in Tokyo for the education of Japanese women along modern lines of education. She is said to be a very accomplished always gown after the most approved fashions.

W. L. DOUGLAS \$3.00 \$3.50 \$4.00 SHOES

The Largest Manufacturer of Men's Fine Shoes in the World.

Wear W. L. Douglas comfortably, as you walk in his shoes. They are made upon honor, of the best leather, by the most skilled workmen, and they are cheaper than any other shoe made.

If you could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would be convinced that they are the best shoes you can wear. They are made by the best workmen, and they are cheaper than any other shoe made.

Wherever you live, W. L. Douglas shoes are within your reach. If your dealer cannot fit you, write for Mail Order Catalog. W. L. Douglas, Brockton, Mass.

Have Heat Brought To You

When your bed-room, bath-room or dining room is chilly, you may have heat brought to you in just the degree you desire. It is easy when you have a

PERFECTION Oil Heater

(Equipped with Smokeless Device)

No fuss—no hurry—no smell—no ash, no smoke. The Automatic Smokeless Device which automatically locks absolutely prevents smoking. Removed in an instant. Solid brass front holds 4 quarts of oil—sufficient to give out a glowing heat for 9 hours—solid brass carry-ers—damp-er too—cool handle—oil indicator. Heater beautifully finished in nickel or Japan in a variety of styles.

Every Dealer Everywhere. If Not At Hand, Write for Descriptive Circular to the Nearest Agency of the STANDARD OIL COMPANY (Incorporated)

Experiment With Soya Bean

making of the black bread of that country, and local millers here are experimenting with a blend to improve their brown bread.

A vegetable cheese is known to be produced from the caseine that is found in the bean, but this has not advanced from the experimental to the commercial stage.

It is reported that one or two Importers of merchants have sent their investigators to Manchuria to study the production of that country's soy bean. It is also stated that one of the large ship owners has introduced the soy bean into Africa, where soil and labor conditions are thought to be peculiarly favorable to the growth of good crops of the soy bean. It is also reported that the British cotton has growing movement at its inception, and some measure of the same success is being predicted for it.

JUST WANTED A SENSATION

Tender Paeleen Not the Only Thing That Promotes Young Man's Question.

The girl was very rich and the young man was poor, but honest. She liked him, but that was all, and he knew it. One night he had been a little more tender than usual.

"You are very rich," he ventured.

"Yes," she replied frankly. "I am worth \$1,250,000."

"Am I am poor?"

"Yes."

"Will you marry me?"

"No."

"I thought you wouldn't."

"Then why did you ask me?"

"Oh, just to know how a man feels when he has \$1,250,000"—Illustrated Sunday Magazine.

Home-Made Bitters.
Loss of appetite at this season accompanied by lassitude is a symptom of weakened vitality. Improve the appetite and digestion and nature will do the rest says a well-known medical man. This is highly recommended and much used in some parts of the country. Ask any good druggist to mix the above compound fluid balsam and add one ounce syrup sarsaparilla compound to a half pint of good whiskey and make a tablespoonful three to six times a day. Excellent too as a tonic system generally.

The Country's Spread.
While the area conceded to the 13 original states by the peace treaty of 1783 was \$28,000 square miles, the present area is but 225,000 square miles, the other 502,000 square miles being in whole or in part 13 other states.

Dyola is the Best Dye I have ever used. It makes a nice color on any kind of goods, cotton, wool, mixed goods. So Mrs. Corbett writes, 10 cents per package at dealers. If not in stock, send 10 cents to Dyola, Burlington, Vt. Mention color desired and we will send you same with color card and direction book.

Worth Its Weight in Gold.
PETTIE'S EYE-SALVE, strengthens, cures, and soothes the eyes. Sold by Druggists or Howard Bros., Buffalo, N. Y.

DO NOT ACCEPT A SUBSTITUTE.
When you want Pettie's Eye-Salve, get the genuine. Beware of cheap imitations. Write for Free Booklet. Dr. J. C. Thompson, 82-1909.

It worries a modest girl if a man tries to kiss her—and it worries a young widow if he doesn't.
