us. We were shown through a mile of tunnels at this level with one cars in us. We were shown through a mile of tunnels at this level with ore ears in operation and electric light wires expansed. We had to dydge both. We saw very rich silver ore down there. This is not being touched on account of the low price of silver and the millions of tons of low grade left by the earlier miners because they could not get a profit out of it with their primitive method. This company saves about \$40 cents at do to get it to the mill with the electric hoists and aerial trapsways and the cost of milling it is less than \$2. They run through about 500 tons a day and have enough to this kind of ore for 20 years run.

We came to the surface by the same conveyance as on the down trip, gave Mr. Burroughs a vote of thanks, and will remember that trip as long as we do the mummles at Guanajuato.
