

Real Estate Exchange

UNCLE SAM is the heaviest egg eater in the world. In fact, so fond is the old U. S. A. of the hen product that another century may see the deposition of the big-headed eagle and the crowning of another feathered monarch.

The following is a partial list of Farms, City and Village Lots, and Real Estate generally which we have for sale. As our list is constantly changing, we request that parties will write us if they do not see what they want in this list.

NEED STRICTLY FRESH EGGS. FANCY BREAKFAST CARTOON. READY FOR SHIPMENT. Illustration of a woman holding a basket of eggs.

increase in price sufficient to yield the speculators a comfortable profit. They estimated the proceeds after all expenses had been met, at four cents on the dozen \$20.00 on the lot.

fruit from the market at the city by the lake had to go eggless Easter. Jim Tatten's what corner will be a mere bagatelle to a prodigious amount of the precious necessities can corner eggs. Small egg corners are frequent, however.

The workers were where they could be called at once, and the minute the word came over the telephone to get the crates out of the cold storage warehouse, the toilers were set to work. Two days later every egg had been sold, the money collected and more than half of them eaten by the consumer.

As he slinked at his destination a sniff likened to the odor of an egg of evil intentions pierced his nasal sense. During the walk to his office he noticed that the smell was everywhere. It was in the street, in the rounds of the office building, in the elevator, in the hall on the ninth floor, and he was dignified beyond measure to find that on entering his office he smelled egg there, too.

The time is remembered by many when the beet eggs brought 12 cents a dozen in retail stores, and the wholesale price was below that. So steep has the conventional cost become that thousands of farmers are nearly devoting their land to the raising of fowls.

DEAD TO ASSIST THE LIVING

Something Overdone in the Foreword Possibilities of Current Science. Uneasy restorations from the dead are foreshadowed by current science.

about upon the leg of a dead companion. In my experiments to preserve arteries," says Carlsson, "I found that if the arteries of a rabbit were severed and placed in a solution of absolute duty, then I put the arteries in refrigerators and kept them in hermetically sealed tubes at a temperature a little above freezing. I found that an artery could be kept alive for 60 days and substituted for the artery of a living animal."

241 Five new houses with all modern conveniences, with 200 ft. of frontage on Woodward Avenue. Price \$35,000.

243 Farm of 160 acres, Saginaw county, 5 miles from Ferguson Station on the R. F. R. Price \$25,000.
