DEBILLY DWARFED.

Although Holland has " Giants" and "midgets" by the score, the latest addition to the smallest class is one of the smallest dwarfs in existence.

Just purchased a tape line and measure 10 1/2 inches and you will know the size of the little fellow, who recently was brought to Holland.

The little fellow is not just in his teens, but when it is known that Johnnie has already passed the age of 10, the little fellow's age is all the greater, as he is over 10 years old.

Johnnie weighs exactly 7 1/2 pounds and notwithstanding his age has all the features of a baby, both physically and mentally, and no physician has ever been able to explain the cause of his condition.

Johnnie has never had any schooling, is unable to read or write, and while it is a blank page the little fellow's mind is a child of that age can comprehend.

Johnnie is said to be more worried in the winter months than in the summer, and has been at any stage of the fever.
