Adhis clerk to open a barrel of an a syphon. The clerk and awallowed some small fast.

The control of the clerk and awallowed some small fast. In the State of Maine ordered his clerk to open a barrel of kerosene oil, using a rubber tube as a syphon. The clerk started the flow by sucking on the tube, and swallowed some of the oil, the cost of which was deduced from his wages. The clerk threw up the oil and, incidentally, his breakfast. He said he didn't care so much about the cost of the oil, but he considered the whole thing in bad taste.
