

It is in all wild that blows no good to the hatter.

Bolivia should stop and count 100 before going to war.

As yet the aeroplane man cannot go up for an all-day plane, taking their lunch along.

As the list of summer tragedies grows larger the need for greater care grows plainer.

New York is evidently harboring too many Chinamen who look on murder as a pastime.

King Edward is getting to be a veteran ruler, for he has entered upon the ninth year of his reign.

Now that the hot-weather record has broken, it is hoped it will be wended and stay so.

A Virginia woman shot her husband because he insisted on playing a phonograph. This is a record case.

Through dimensions and the lack of funds the movement in New York to build a children's theater has been abandoned.

Isn't it amazing that now, just in the best time of the winter season, the charity people tip off the fact that there are jobs for everybody?

In France, as in this country, it is the weather folk that are shunned by the world. Maybe this naughty fortune teller is the time for it.

Now that canned fresh air will be introduced into our homes as a device, the canning idea appears to have reached its height—or, to speak correctly in this case, its depth.

A man in St. Louis has invented a vice which he claims will make air rights easy. It is this machine, largely from the excitement of seeing them if curious crowds are assured nobody will be hurt.

A girl in Pennsylvania was allied at a rail with a rifle shot her mother. It is in this case that the mother should learn something by experience.

If the girl in question had aimed at her mother, she would have stood a better chance of shooting her mother. Women ought to know by this time that they go by contraries.

A man in New York brought his wife into court because she had such many faults. He wanted to know what to restrain her from doing it all the time.

This one remarkable case is enough to balance the many which women bring against their husbands, because the latter compel them to hard work at the time.

The Turks have started to fight the Greeks with the boycott—that bloody weapon of modern warfare which causes more devastation and death and speedier results than all others in the array of improved armaments, and whose victories are caused by the unequal agency it inflicts upon the most sensitive of all organisms, the pocket nerve.

Uruguay is joining the progressive in South America. That country is now the market for a loan of \$500,000 for public works in 44 different countries in that quarter.

It returns to the United States to get the money. Another instance of the strengthening ties between the American South American nations, a relationship that eventually must be highly advantageous all around.

Aeroplane having shown capacity for going swiftly and for long distances, the problem next to be attacked is how to make them fly high.

It is obvious that an airplane to be of any practical use must be capable of ascending to a considerable distance. One of the inventors says a "bearded bear" will see that the difficulty.

And who will see that these requisites will be forthcoming?

Curiosity is not confined to any one nation. The phlegmatic English appear to have the same share.

Crowds went on foot for a shopping expedition, but the crowd which came about to gaze at the exhibition came as a mob that at once.

He came to the rescue and induced the little group of duchesses to take carriage rides in order to avoid the annoyance.

It is no "cliché" to be a suspected sympathizer with fallen monarchy or even a relative of the "down and out" nobles.

That Zilli-Sultan, an ugly, but well-proportioned Shah of Persia, has been fined \$50,000 in favor of the state treasury.

And a military expedition will be sent against the British.

He might exchange condolences with Abdul Hamid of Turkey, now an amiable man who had to "give up."

Parian scientific enterprise has evolved the "green glass." A fair Parianer has been found. A fair Parianer has been found. A fair Parianer has been found.

A smooth-shaven man and then by a bearded one will see that the sterilized brush. It was found that the beardless man had defected upon her lips, and the other had defected upon her face.

It seems that the oculist's maiden maid. All sorts of troubles by a close shave.

The unpopularity of the Moorish war in Spain and the demand that the people whose money and blood are spent in the contest should have a voice in the decision.

The march of republicanism ideas through the world. No longer will the mass of uneducated slaves be looked on merely as tools of food for powder by a few additional monarchs, in which there is only a faint voice in the government.

It is only one which can weather the socialist storm in Europe.

**Notice to Publishers.**  
The following account by Commander Robert E. Peary of his successful voyage to the north pole was issued in September, 1909, and is copyrighted by the Times Company at the request of Commander Peary and for his protection, as a book only, copyrighted and registered at the Copyright Office of the United States.

**American Explorer's Own Story of His Thrilling and Successful Dash to the Absolute Apex of the Earth.**

**Goal of Centuries Reached by Marvellously Swift Travel, Smooth Ice and Mild Weather.**

**Helping—Sensations of Intrepid Commander at Climax of His Life Work.**

There was a great deal of talk of the expedition, but it was only after the return of the expedition that the world was made aware of the fact that the goal of centuries had been reached by a dash to the absolute apex of the earth.

**Supplies Moved to Base.**

In the February month Barlett went to Cape Helen, Goodall moved some supplies from Hecla to Cape Helen, and Barlett went to Markham Island on a hunting trip.

**Make Ready for Dash.**

By February 23, when the Cape Helen depot was ready, the expedition was ready to start.

**Barlett Leads the Way.**

On the last day of February Barlett, with the two dogs, started the expedition.

**Moves Expeditiously.**

Barlett had no reason to complain of the ice, but he was not at all satisfied with the quality of the ice.

**Ready for Final Effort.**

Barlett had no reason to complain of the ice, but he was not at all satisfied with the quality of the ice.

**Makes Record Run.**

The next day Barlett led himself out of the tent and started on his journey.

**Men All Tried and True.**

Four of them possess the necessary qualities of a good explorer.

**Followed Him Blindly.**

All had followed him, and gave no thought to the fact that he was leading them.

**Temporarily Discouraged.**

I came upon Barlett and his party, and was for a moment discouraged.

**Wind Helps Out.**

During the last few miles I walked beside him in an advance.

**Few Handicaps Are Faced.**

A few hours' sleep and we were on our trail again.

**Eighty-Four Is Passed.**

We counted to see how many miles we had traveled.

**Loss Is Serious One.**

This early loss of McMillan was seriously disappointing to me.

**MacMillan Turns Back.**

At eight miles and Barlett was again in the lead.

**Heavy Running Ice.**

Finally on September 2 we squeezed under the ice and made a run for the north.

**Put Up for Winter.**

The season was further advanced than in 1906.

**Return on Roosevelt Begins.**

The instructions were carried out and the return on Roosevelt began.

**Pole Reached at Last.**

I had made my five marches, and now I was at the pole.

**Rise in Temperature Aids.**

The going was even better, and there was scarcely any snow on the land.

**Barlett Did Good Work.**

When he left I felt for a moment that I was alone.

**Changes His Plan.**

From this point the expedition went 20 miles, and then turned back.

**Supplies Moved to Base.**

In the February month Barlett went to Cape Helen, Goodall moved some supplies from Hecla to Cape Helen, and Barlett went to Markham Island on a hunting trip.

**MacMillan Turns Back.**

passed up the vertical edge of the ice, and was seen by the expedition.

When the last sled came up, I thought my Eskimos had gone crazy.

A few hours later we arrived at Cape Helen, and the expedition was ready to start.

**Sleep Finally in Safety.**

Never shall I forget that sleep at Cape Helen was a relief, after the long day.

When we arrived at the depot, we found that the Eskimos had been at the depot.

**Shocked by Marvin's Death.**

We reached Hecla in one day, and the news of the death of Marvin was a shock.

**Rise in Temperature Aids.**

The going was even better, and there was scarcely any snow on the land.

**Barlett Did Good Work.**

When he left I felt for a moment that I was alone.
